## **South Carolina Public Service Authority**

Presentation to:

## Public Service Authority Evaluation and Recommendation Committee

September 5, 2018

## Agenda

- Cost and Rate Development
- Santee Cooper Hydroelectric Project
- Parks, Conference Centers & Economic Development
- Water Systems
- > Nuclear

## **Cost and Rate Development**

# Cost-of-service may be defined as the amount of revenue a company must collect from *rates* charged consumers to recover the *cost* of doing business.

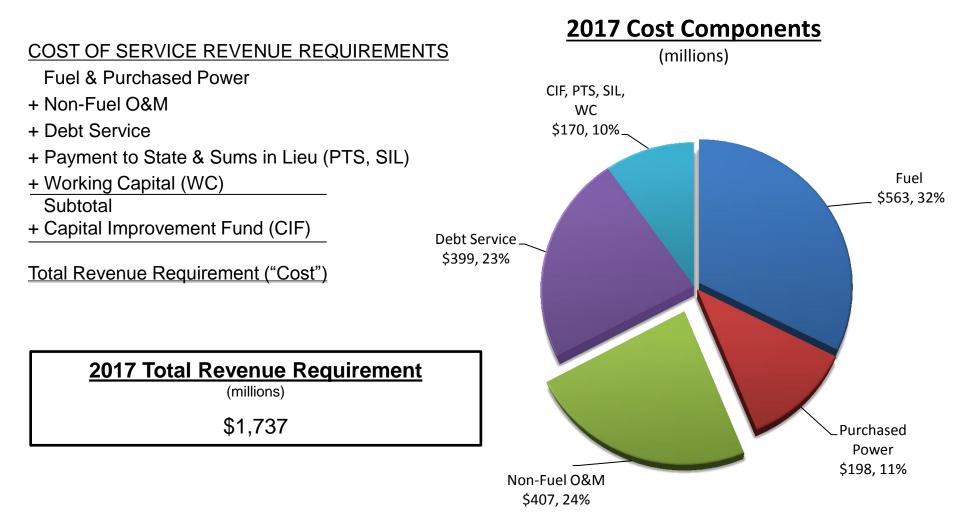

Santee Cooper uses the Federal Energy Regulatory Commission (FERC) Uniform System of Accounts to maintain the books and records for the Electric System

- This is the system of accounts used by most electric utilities
- Allows utilities to report consistently (FERC and Energy Information Administration reports)
- Provides detailed descriptions of what assets, liabilities, expenses and income should be charged to each account
- Utilities frequently use this system of accounts to categorize costs when developing rates

There is a similar uniform system of accounts typically used by water utilities prescribed by the National Association of Regulatory Commissioners (NARUC). Santee Cooper uses NARUC for the two Water Systems.

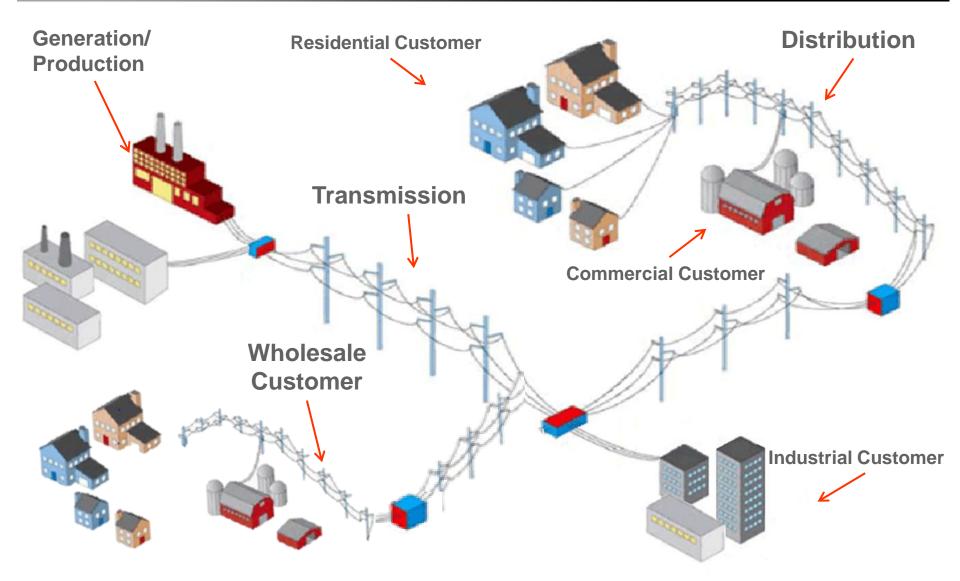

### Santee Cooper Electric System: Overview of Cost Components

#### What does it mean to functionalize costs?

#### FERC accounts break expenses into major utility functions

- Power Production
  - Further broken down to Steam Power, Nuclear Power, Hydro Power and Other
  - Includes Fuel and Purchased Power
- Transmission
- Distribution
- Customer Accounts
- Customer Service and Informational Expenses
- Sales Expense
- Administrative and General

#### Historical Fuel, Purchased Power & Non-Fuel O&M

2017

2016

\$ 775,737,065

\$1,188,922,717

2015

FUEL & PURCHASED POWER

\$ 760,696,099

\$ 906,954,226

#### NON-FUEL O&M

#### **Production O&M - Non-Fuel**

AL NON-FUEL O&M	\$	406,646,959	\$	413,185,652	\$	410,407,5
dministrative & General	\$	105,647,661	\$	98,005,867	\$	93,170,6
ustomer Service & Accounts and Sales	\$	28,111,578	\$	26,636,048	\$	28,792,3
	•		•		•	
stribution	\$	15,378,609	\$	15,865,142	\$	15,339,9
ansmission	\$	32,761,572	\$	33,766,521	\$	35,424,4
	Ψ	22-,1 +1,000	•	200,012,014	•	201,000,1
TAL Production O&M - Non-Fuel	\$	224,747,539	\$	238,912,074	\$	237,680,1
Renewable Landfills <sup>1</sup>		3,860,256		3,498,076		4,347,5
Other Common		874,100		625,687		565,7
Hydro - Jefferies & Spillway		10,934,829		10,568,938		9,973,9
Hilton Head Generation		296,866		255,184		184,4
Myrtle Beach Generation		487,885		244,495		299,
Nuclear Power Generation		62,048,103		65,778,445		62,032,7
Rainey		12,752,193		13,106,402		19,055,4
Grainger Generation		220,995		70,777		947,7 280,4

Winyah Generation		52,979,034		57,079,750		55,523,0
Cross Generation	\$	79,499,096	\$	86,806,966	\$	84,468,7

TOTAL OPER & MAINTENANCE

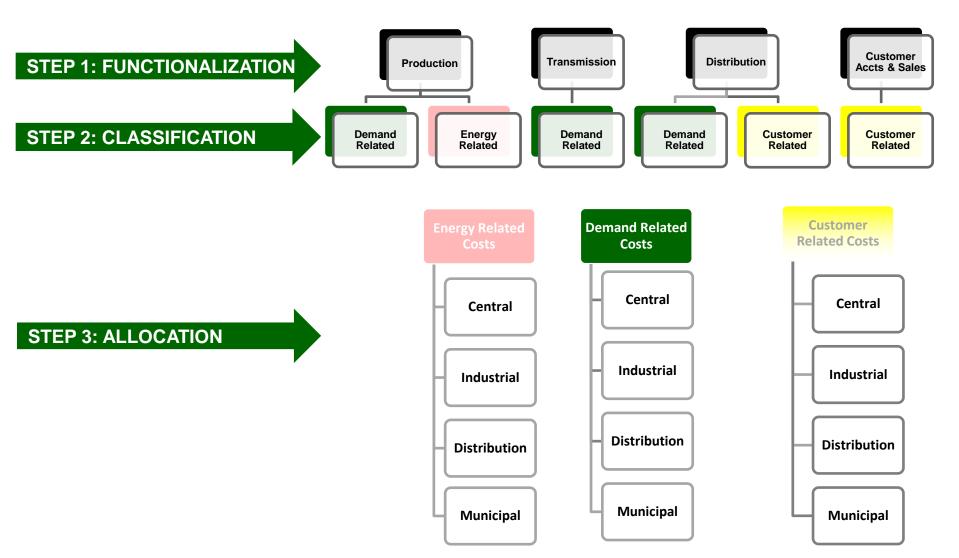

1 Includes Georgetown County, Richland County, Lee County, Anderson County, Horry County, and Berkeley County landfills.

\$ 1,167,343,057

\$ 1,317,361,773

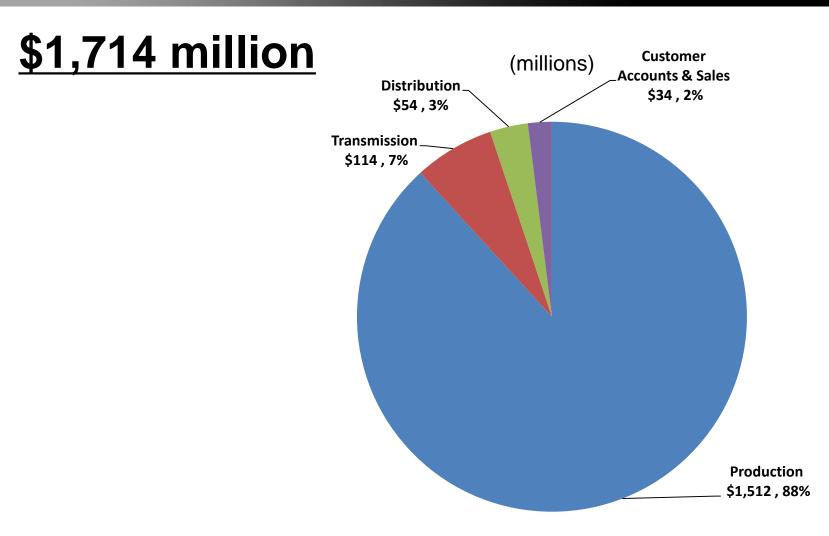

#### **Three Basic Steps to Ratemaking**

# 2017 Net Electric System Revenue Requirement by Function<sup>1</sup>

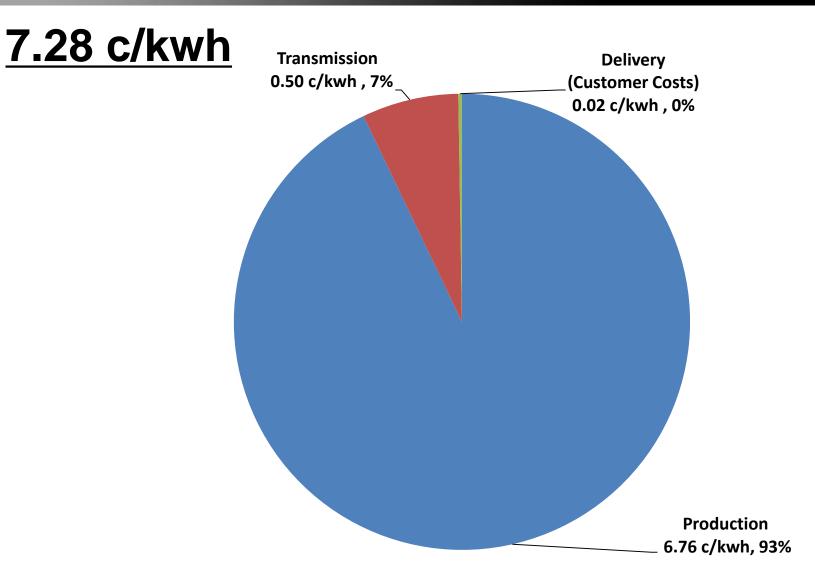

1 Net of other income and revenues of \$22.6 million, which includes \$11.4 million of interest income.

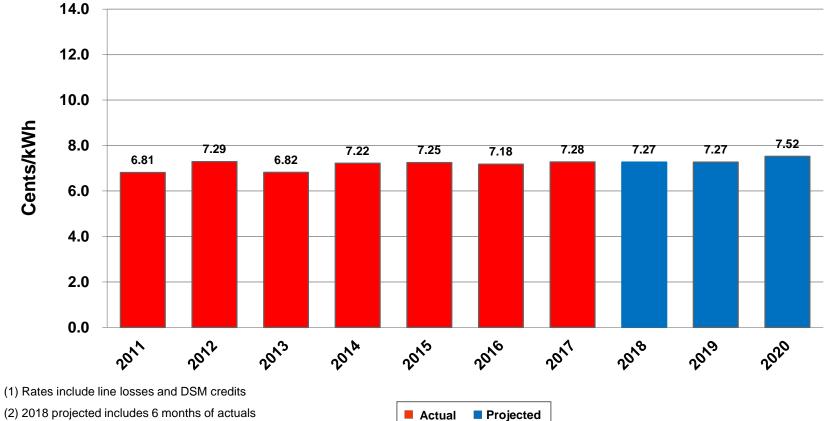

#### **Central 2017 Cost of Power**

(2) 2018 projected includes 6 months of actuals

(3) 2019-2020 projections based on Central 2018 Cost of Service.

(4) The average annual inflation rate for the period shown was 1.7%.

FERC Accounts 535-545 are for recording the operating & maintenance cost of hydraulic power generation. By definition these accounts include:

 Costs incurred in operating hydraulic works including reservoirs, dams, and waterways, and in activities directly relating to the hydroelectric development outside the generating station. It shall also include the cost of labor, materials used and other expenses incurred in connection with the operation of (a) fish and wildlife, and (b) recreation facilities.

	2017	2016	2015	
Expenses				
Hydro -Production	\$ 10,934,829	\$ 10,568,938	\$	9,973,961
Hydro -A&G	812,086	986,567		858,417
Total Hydro Non-Fuel O&M	\$ 11,746,914	\$ 11,555,506	\$	10,832,378
Revenues				
Leased Lots	\$ 1,111,703	\$ 1,033,002	\$	960,849
Timber Sales	238,985	573,914		84,575
Total Revenue	\$ 1,350,688	\$ 1,606,916	\$	1,045,425

# **SC Hydroelectric Project**

- Federal Energy Regulatory Commission
- Santee Cooper Project
- FERC License Requirements
- Relicensing

The Federal Energy Regulatory Commission (FERC) licenses and inspects private, municipal, and state hydroelectric projects. (18 CFR Part 4)

Under the Federal Power Act, hydropower projects must be licensed, or granted an exemption from licensing if the project:

- Is located on a navigable waterway of the United States;
- Occupies lands of the United States;
- Uses surplus water or waterpower from a government dam; or
- Is located on a stream over which Congress has Commerce Clause jurisdiction, is constructed or modified on or after August 26, 1935, and affects the interests of interstate or foreign commerce.

## **FERC License**

I. O. C. Merrill, Executive Secretary of the lederal Power Commission, do hereby certify that the following is a true and correct copy from the record of the proceedings of the Commission in my of that portion of the minutes of the seventy-minth meeting of the Commission, held on the 14th day of way, 1926, which refers to the approva of issuance of license for Project No. 199:

"The Executive Secretary presented the following list of

licenses, amendments, and transfer thereof which have recently been executed, recommending that the action of the Executive Secretary in issuing these instruments, pursuant to authority in each case given by the Commission, be approved.

"The Commission thereupon took action as follows

"In order that the minutes of the Commission may contain record of the formal approval by the Commission of the licenses, amendments, and transfer of license executed and issued by the Executive Secretary, under authority of the Commission's Orders, No. 2, it was voted that the following licenses, amendments of licenses, and transfer of license accepted and/or issued on the dates respectively named, be and the same are hereby approved by the Commission:

"Licenses:

#### Project Lo. 19

Columbia Hailway & Havigation Company Santee and Cooper Rivers Berkeley and Orangeburg Counties, South Carol Authorized July 17, 1924 Accepted by licensee March 15, 1926 Issued April 2, 1926." Witness my hand and the seal of the kederal Fower Commis Washington, D. C., this 20th day of May, 1926. Executive Secretary

- The FPC was established by Congress in 1920 to coordinate hydroelectric projects under federal control.
- On April 2, 1926 the Federal Power Commission (FPC) issued a license for Project No. 199 to the Columbia Railway & Navigation Company. The license was subsequently transferred it to the South Carolina Public Service Authority.
- In 1977, Congress reorganized the FPC as the Federal Energy Regulatory Commission (FERC).

- Original 50 year license issued April 2, 1926.
- Current 30 year license issued May 9, 1979 until March 31, 2006.
- License renewal application submitted January 5, 2004.
- Operating under annual license renewals since 2006
- The terms and conditions of the License Order are outlined in 61 Articles and a 1986 Order approving a Comprehensive Emergency Action Plan.

Renew the License

• Surrender the License

• Transfer the License

## Santee Cooper Project

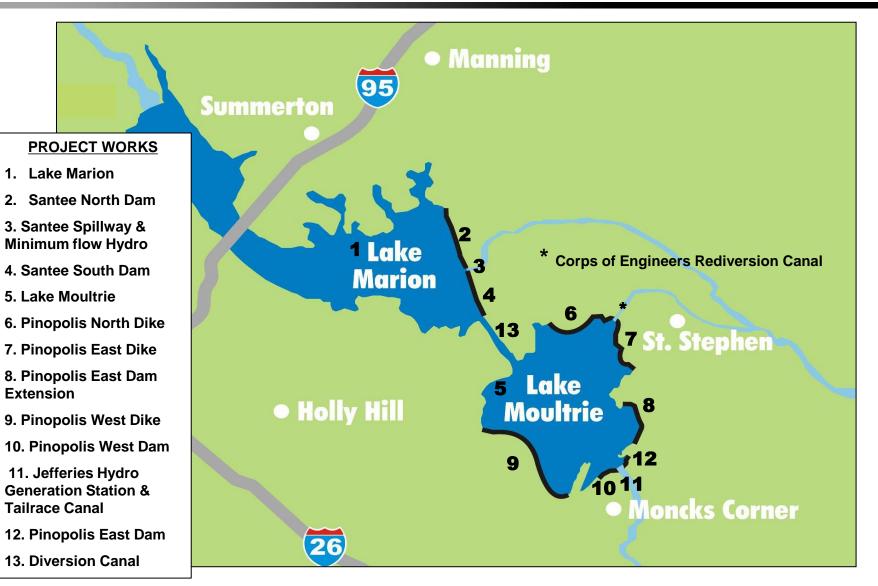

The Hydropower Project affects navigable waters of the United States and United States lands in the Francis Marion National Forest

It is located on the Santee and Cooper Rivers in Berkeley, Calhoun, Clarendon, Orangeburg, and Sumter Counties.

The Project includes the 110,000 Acre Lake Marion impounded by the Santee Dams on the Santee River; the adjacent 56,500 Acre Lake Moultrie impounded by the Pinopolis Dam and several dikes; and, a 7.5 mile-long diversion canal connecting the two reservoirs.

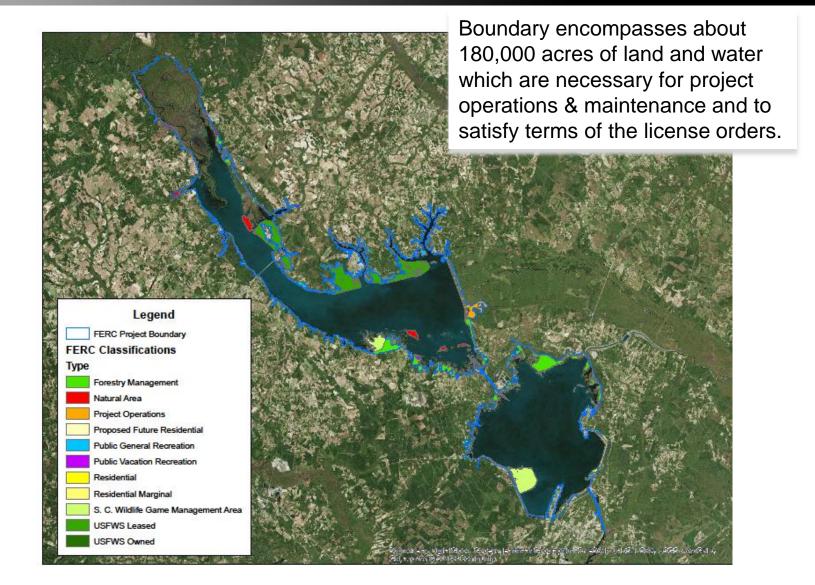

## **Project Works**

## **Project Boundary**

- 1) Hydroelectric Generation
- 2) Navigation
- 3) Aquatic Weed Control
- 4) Vector Control
- 5) Water Quality Monitoring
- 6) Land Management & Use Classifications
- 7) Forest Management
- 8) Wildlife Habitat
- 9) Recreation
- 10) Public Access & Boat Landings
- 11) Public Safety and Security
- 12) Lake Management
- 13) Dam Safety

## Hydroelectric Generation

"Hydropower, generated mainly from hydroelectric dams, is a clean, renewable, non-emitting source of energy that provides low-cost electricity and helps reduce carbon emission. It is more efficient than any other form of electricity generation and offsets more carbon emissions than all other renewable energy sources combined."

~House Committee on Natural Resources

## Key Project Purpose:

- Jefferies Generating Station 140 Mw
- Santee Spillway Generating Station 2 Mw
- \*St. Stephen, Corps of Engineers 84 Mw

\*Owned and operated by COE, outside FERC jurisdiction.

## Navigation – Article 12, 23 & 25

The project made navigation possible from Charleston to Fort Motte.

- Pinopolis Lock - Navigation Channel

## Aquatic Weed Control – Article 51

In 1974 the SC General Assembly passed a joint resolution calling for Santee Cooper to do everything in its power to "remove noxious weeds and grasses from the Santee Cooper Lakes."

1940s targeting Alligatorweed

1970s targeting Brazilian Elodea

## Vector Control – Article 44

By 1948 there was not a single reported case of malaria in any of the counties around the Santee Cooper Lakes.

## **License Requirements**

## **Vector Control Zones**

## Water Quality Monitoring – Article 47

- Depth
- pH
- DO
- Temperature
- Specific Cond.
- Secchi Disc
- Turbidity
- TSS
- E.coli
- Ammonia
- Nitrate
- Nitrite
- Total Phosphorus
- Chloride
- Sulfate
- Phytoplankton
- Chlorophyll
- Stream Flow

- TKN
- Mercury
- Bromide
- Fluoride
- Arsenic
- Cadmium
- Calcium
- Chromium
- Cooper
- Iron
- Lead
- Zinc
- Sodium
- Potassium
- Manganese
- Magnesium
- Hardness
- Selenium

## Land Management - Article 41, 45, 49 & 61

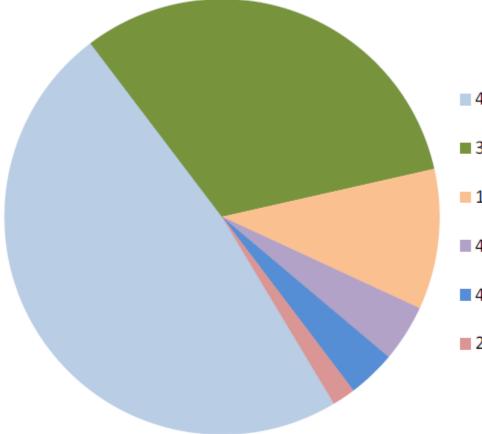

- Requires review and management of Project lands for authorized and unauthorized use within the Project boundary or affecting Project lands and water
- Inspect for compliance with rules, regulations, lease provisions, setbacks and covenants

## Land Use Classifications – Article 13, 48 & 50

48% - Natural Areas

- 32% Forest Management Areas
- 10% Project Structures
- 4% Residential
- 4% Recreation
- 2% Commercial

## Forest Management – Article 20, 27 & 34

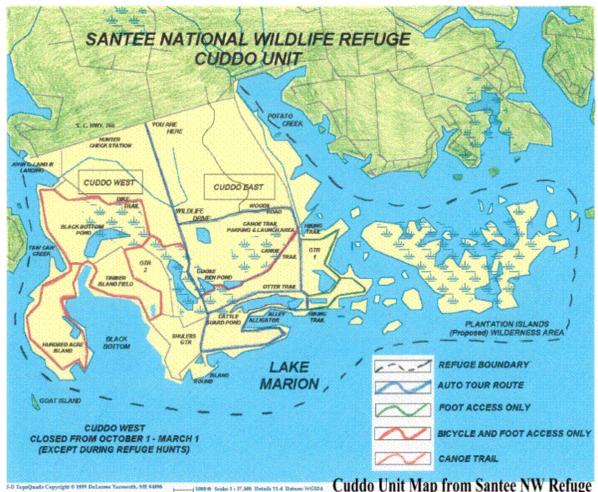

- Approximately 25,500 acres of forest land are associated with lakes.
- An additional 18,000 acres +/of undeveloped land are in the Upper Santee Swamp which is outside of the Project Boundary

### Wildlife Habitat Article 15, 16, 59 & 60

Over 11,700 acres (10% of project lands) are dedicated to Natural Areas and are nondevelopable.

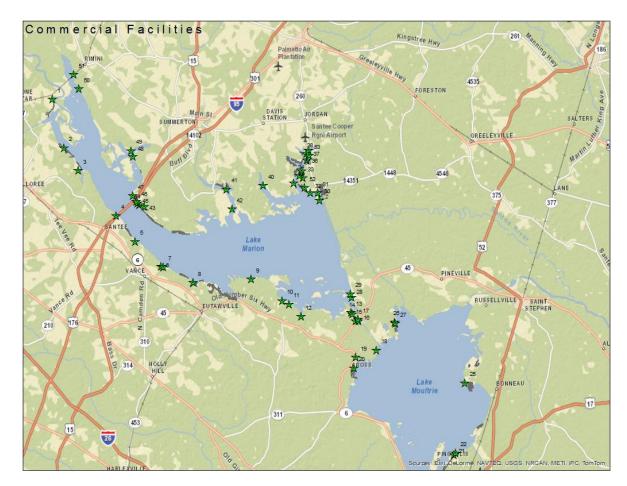

## Recreation - Article 17, 18, 43, & 57

**53** Commercial Facilities with campgrounds, marinas, and boat landings

**38** Fish attraction sites within the lake to improve fishing opportunities

**34** Public recreation sites with access for fishing, hunting & boating.

## **License Requirements**

## Recreation & Tourism

The five counties around the lakes realized **\$415 million** in tourism revenues in **2016**, tourism-related employment numbered **3,750 jobs** and the annual payroll totaled **\$69.6 million**.

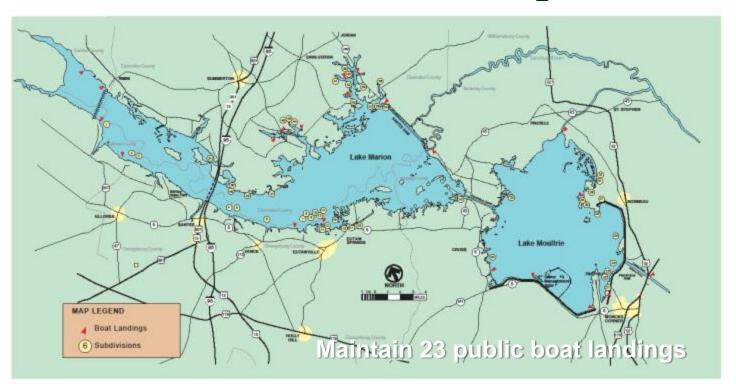

#### **Public Access and Boat Landings**

## Public Safety and Security – Article 40

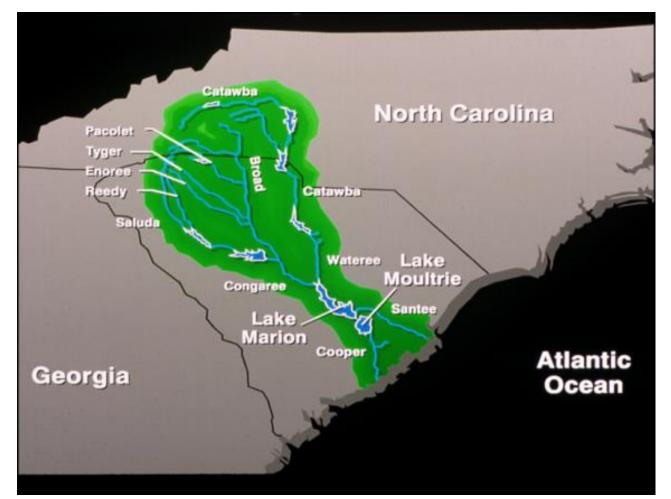

Maintain a Public Safety Plan and report a project safety condition or public safety event when it is discovered.

Licensees must file an annual security certification letter with FERC.

### Lake Management – Article 8, 10, 19, 20, 21, 42, 46

### Spillway Operation to Manage Levels & Flows

Minimum Flow = 650 cfs

Flood Flow = 35,500 cfs

## Dam Safety – Article 29, 38 & 54

FERC regulates both the construction and operation of hydropower projects.

Dam Safety is a critical part of FERC review.

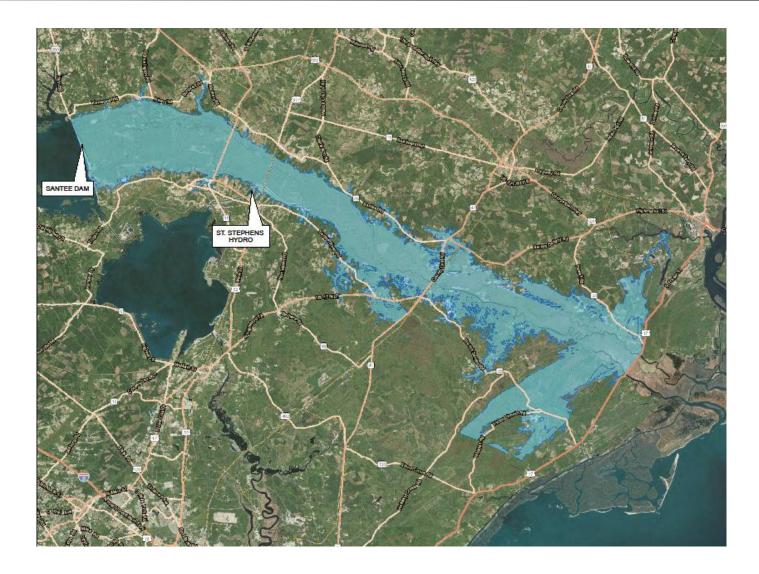

Hydroelectric Facilities are classified as Critical Energy Infrastructure and information is protected.

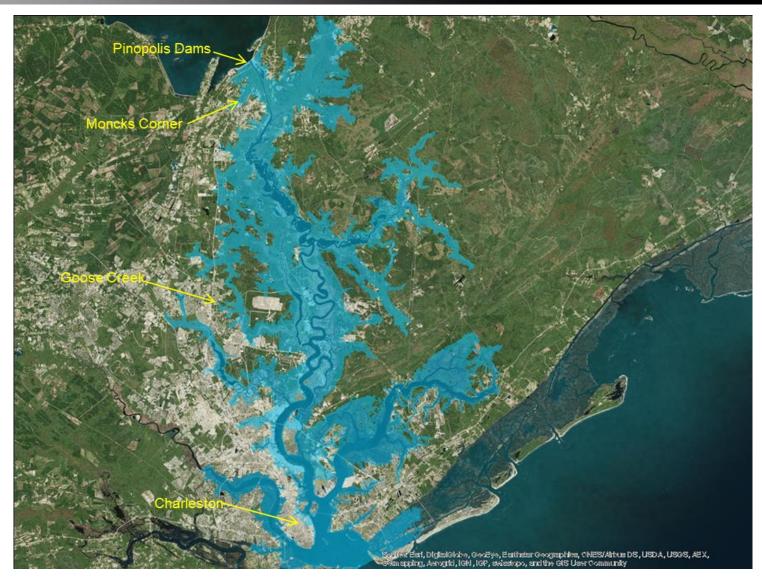

**Upstream Slope Protection Improvement** 

## **Emergency Action Plan for Dam Safety**

Major Potential Capital Costs:

- Fish, Eel & Sturgeon studies at Pinopolis and Santee
- Fish passage at Pinopolis
- Eel passage at Pinopolis and Santee
- Sturgeon passage at Pinopolis and Santee
- Implement Turbine Protection Plans
- Implement Pinopolis Lock Protection Plan
- Granby Dam removal
- Increased minimum flows at Santee Dam

## → Estimated Costs: \$179M

## **FERC License Compliance**

Santee Cooper Staff supporting FERC License Compliance Full Time Equivalents:

•	Generation	25
•	Environmental Resources	10.5
•	Property	12
•	Dam, Spillways, & Navigation Maintenance	12
•	Security	10
•	Lake Management for flows and levels	1
Total		70.5

#### Estimated payroll:

\$ 7 million

# Parks, Conference Centers & Economic Development

## Wampee & Somerset

## Wampee

- Conference and Training Center
- Utilized for internal meetings & training
- Utilized by customers, governmental groups and non-profit groups for meetings
- Board of Director meetings
- Used by SCDNR for watercraft storage & lake access
- Used by Berkeley County Sheriff's Office for lake access
- 9 FTE's

6,000 visitors 258 events

(2017)

## Somerset Point

- Recreational area for employees, retirees, their families and guests
- Provided as a recruitment and retention benefit to employees
- Available for rent to outside groups on weekdays
- Meeting space for employees, retirees, community and company events
- 2 FTE's

81,000 visitors

(2017)

- Recreational area for employees, retirees, their families and guests
- Provided as a recruitment and retention benefit to employees
- .5 FTE's

Mission: To protect and promote the historical & natural significance of the area through education, recreation and services

- At request of state, it was converted from a state park in 1999
- Facilities includes Stony Landing House, Interpretive Center, Learning Center, picnic shelters & Berkeley County Museum
- Public park, public fishing area, canoeing & nature trail
- Provided to non-profit organizations & civic groups for community meetings/events
- Rented to external groups for meetings/events
- Utilized for internal meetings & training
- 9.5 FTE's

43,000 visitors 21 Days of Community Events 1600 Volunteer Hours (2017)

## **Parks and Conference Centers**

	(\$ in Dollars)		
ARKS & FACILITIES	2017	2016	2015
Wampee 1			
Cost	\$ 1,148,815	\$ 1,116,910	\$ 1,213,331
Revenue	(86,056)	(102,142)	(117,887
Net Expense	1,062,760	1,014,768	1,095,444
Somerset 1, 3			
Cost	236,041	259,431	303,878
Revenue	(24,385)	(22,656)	(26,601

Stilley			
Cost	28,967	55,501	31,452
Revenue	-		
Net Expense	28,967	55,501	31,452
TOTAL	\$ 1,964,219	\$ 2,211,937	\$ 2,214,320

1 Wampee & Somerset Common cost allocated 65% Wampee/35% Somerset

2 Overton is part of hydro unit but cost are not segregated because they are managed by the same work unit.

3 Somerset cost per employee in 2017 was \$121.

## **Economic Development**

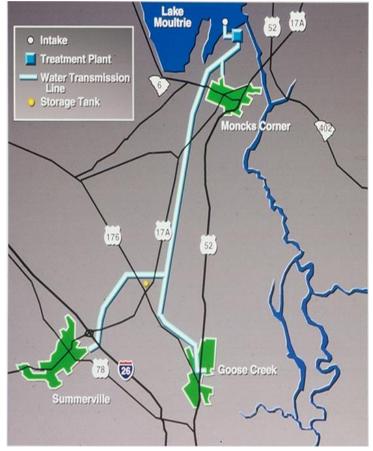

- Economic Development Grants \$40 million
- Economic Development Loans \$93 million
- ➢ Jobs Created 30,457
- Capital Investment attracted to State \$7 billion
- > Approximately \$1 million per year operating costs

## Water Systems

## Lake Moultrie Water System

#### Capacity:

• 40 Million Gallons per Day

Operational Rates: \$0.63/1000 Gallons

#### Serves: Over 182,000 people

- Summerville CPW
- City of Goose Creek
- Moncks Corner Public Works
- Berkeley County Water & Sanitation Authority

#### Net Book Value: \$46,143,584

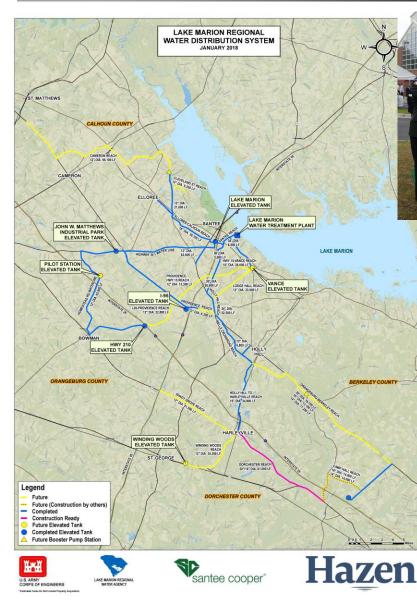

## Lake Moultrie Water System

Lake Moultrie Water Agency			
Revenue Requirements *			
	2018	2019	2020
Debt Service	\$ 3,262,170	\$ 2,940,972	\$ 2,965,046
Operation and Maintenance	\$ 4,556,120	\$ 4,711,504	\$ 4,864,376
Sums in lieu, Pmt to State,	\$ 96,757	\$ 12,951	\$ (2,432)
Working capital, & other income/credits			
Capital Improvement Allowance	\$ 742,559	\$ 722,643	\$ 739,257
Total Revenue Requirements	\$ 8,657,606	\$ 8,388,070	\$ 8,566,247
Annual Volumetric Flow (million gallons)	7,294.8	7,627.5	7,975.2

## Lake Marion Water System

#### Capacity:

- 8 Million Gallons per Day
- **Operational Rate:** \$2.70/1000 Gallons

#### Planed:

An additional 75 mile of Transmission

#### Serves: Over 2,900 people

- Town of Santee
- Orangeburg County
- Dorchester County
- Calhoun County
- Berkeley County
  - Net Book Value:

\$0 – Grant Funded

## **Nuclear**

## **Regulatory Accounting**

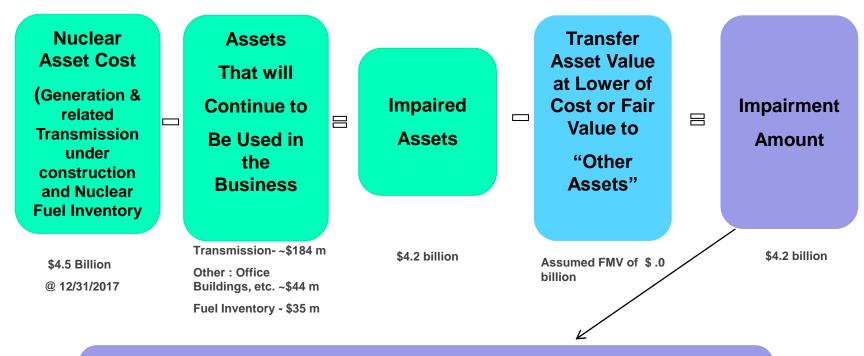

Accounting Standards allow utilities to defer specific <u>expenses</u> or <u>revenues</u> from the income statement to the balance sheet to align with rate recovery.

Allows matching of revenues and expenses over a specified time period (matching principle) and enables stable rate recovery

- 3 requirements for the use of Regulatory Accounting
  - Governing Board approval of rates
  - Rates are designed to recover the costs (or give benefit of income)
  - Reasonable to assume that rates are set at levels that will recover the costs and can be charged to and collected from customers.

#### **Accounting for Nuclear Impairment**

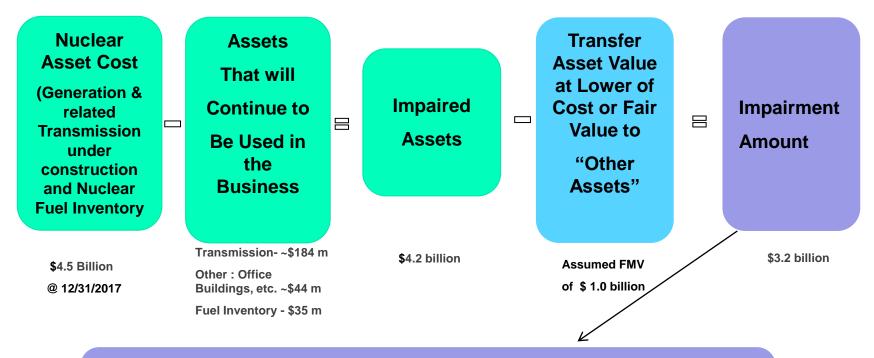

#### **Options for Recording & Writing off the Impairment Amount:**

- -Expense Immediately (Reduces R/E)
- Record Regulatory Asset (Expense over time; align with rate recovery)

#### Impairment Example Assuming FMV of \$1 Billion

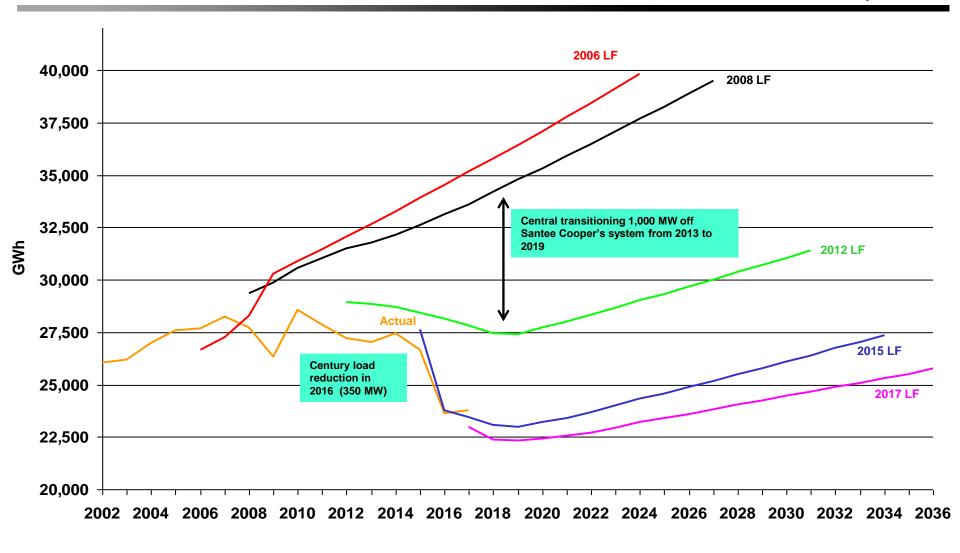

#### **Options for Recording & Writing off the Impairment Amount:**

- -Expense Immediately (Reduces R/E)
- Record Regulatory Asset (Expense over time; align with rate recovery)

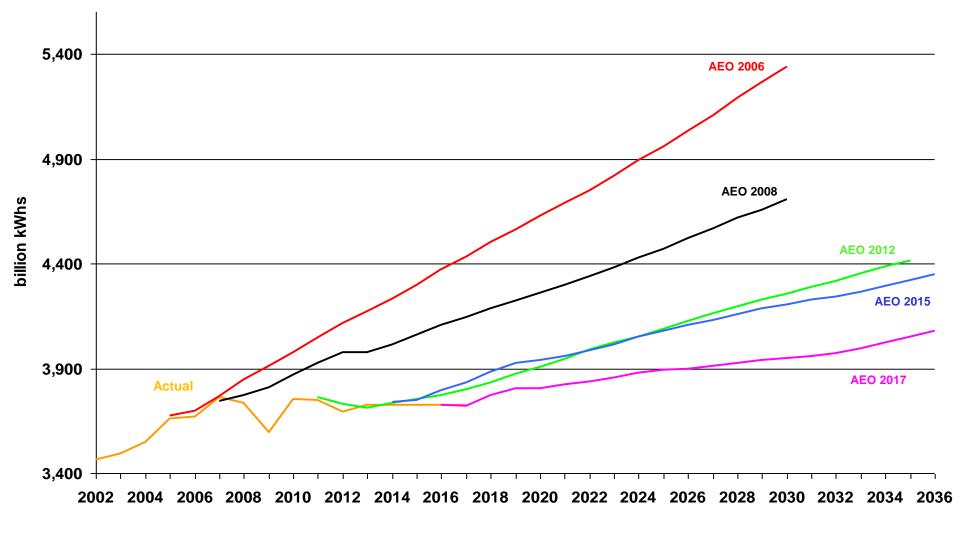

## Other

# Santee Cooper – Load Forecast History <sup>(1)</sup> Santee cooper<sup>®</sup>

(1) Generation level excluding off-system sales. Central's portion of the System's load forecast is provided by Central.

## U.S. Energy Forecast (EIA) Santee cooper<sup>®</sup>

#### **Bonds**

- Santee Cooper issues a combination of tax-exempt and taxable Revenue Bonds under its Revenue Obligation Bond Resolution
  - <u>Tax-Exempt Bonds</u> Bonds issued by a governmental entity for a "governmental purpose" such that bondholders are not subject to federal income tax on bond interest. Most public power utilities are allowed to tax exempt bonds.
  - <u>Taxable Bonds</u> Bonds issued by non-governmental entities or issued by a governmental entity for a "private business use" or "private use" as defined by Internal Revenue Code Section 141. Roughly 20% of the bonds issued by Santee Cooper are taxable.

#### Call Options and Refinancing

- <u>Tax-Exempt</u> Following municipal market conventions, in most cases tax exempt bonds are callable at par 10 years after the issue date
- <u>Taxable</u> Following taxable bond market conventions, taxable bonds are callable anytime with a make whole call provision. Make whole call provisions typically require call prices that are much higher than par value.

#### **Private Use**

- The Internal Revenue Code generally exempts from federal taxation income on bonds issued by state and local governmental entities
  - Giving the entity the ability to issue "tax-exempt" bonds
- In certain instances when a governmental entity issues bonds the proceeds of which will be spent on a "private business use" or "private use" the bonds issued will be taxable
  - In general "private business use" means direct or indirect use in a trade or business carried on other than by a governmental unit
- Santee Cooper, with its external advisors, calculates the private use in each new bond issue that is not for the purpose of refunding existing debt
- Typically wholesale sales are considered private use unless made to a governmental wholesaler (e.g., a municipality)
  - Although wholesale, sales to Central are not considered private use based on a ruling from the IRS that the contract has been "grandfathered in" under regulations in place prior to 2002
- Industrial sales are also considered private use
- Retail and residential sales are <u>not</u> considered private use

## **Questions?**
