AGENCY'S DISCUSSION AND ANALYSIS

The South Carolina Revenue and Fiscal Affairs Office (RFA) was formed under the 2014 Restructuring Act and is governed by three appointed members of the Board of Economic Advisors (BEA). Under S.C. Code of Laws §11-9-1110, the BEA is comprised of one member appointed by the Governor to serve as chairman, one member appointed by the chairman of the Senate Finance Committee, one member appointed by the chairman of the House Ways and Means Committee, and the Director of the Department of Revenue who serves ex officio with no voting rights. BEA members have working knowledge and experience in economics, revenue forecasting, and the state budget process.

RFA consists of three divisions and multiple programs: Mapping and Operations which consists of Business Services, Geodetic Survey, Information Security, Privacy Compliance, Strategic Planning and Communications, and Wireless 9-1-1; Fiscal Analysis which consists of the Board of Economic Advisors and Economic Research; Health and Demographics which consists of Development, Health Resources, Information Technology, Online Analytics and Statistics. Precinct Demographics and Human Resources report directly to the Agency Head. Through various programs, RFA is responsible for providing a diverse set of fiscal and statistical analysis, reports, and services to the Governor, General Assembly, state and local government entities, and the private sector. The agency is dependent upon many professional staff to fulfill statutory requirements.

Values

Integrity • Service • Excellence • Innovation

As in previous years, the goals listed in our Accountability Report center on the four pillars of the agency. Ten strategies were identified to facilitate the achievement of those goals and twenty-one measures developed to determine our success in moving forward. We met or surpassed seven of our measures and came within less than one percent of meeting five additional measures. Progress on four measures was slowed by COVID-19 but these are expected to be met by calendar year end. The remaining five measures were not met but these did not represent a significant setback as the results showed consistent performance with previous levels. Also, each goal and strategy had at least one successful measure which indicates we are moving in the right direction.

**Achievement Status of Agency Goals
as Measured in Agency Accountability Report
FY 201920**

- Met
- COVID-19 slowed progress - plan to meet by end of calendar year
- Missed target by less than 1%
- Not within target

We also learned that sometimes more important than reaching your goals is growing from challenges, especially in the area of business continuity. We came together with spirit, determination, and dedication and overcame unforeseen obstacles to ensure continued operations and services to our customers. We are stronger as an agency because of all that we learned during these extenuating circumstances.

Responding to urgent needs related to the sudden and widespread impact of COVID-19 interrupted the agency's focus on obtaining some of our FY 2019-20 goals. In some instances, COVID-19 affected progress toward our annual goals as travel and other restrictions affected work products and workflow with customer requests. Therefore, in order to keep the agency operational, time and resources were used to develop new procedures and technology necessary to implement a broader tele-commuting plan. On a positive note, however, COVID-19 presented unplanned opportunities for the agency to highlight and share our resources and expertise with others to assist them in responding to these new challenges and issues.

The agency, furthermore, identified and accomplished ten unplanned or other tasks of importance that will help us meet our vision. These range from developing a document that will serve as the link between staff and our mission to demonstrating an online analytic query tool that will present publicly available data in attractive dashboards with dynamic reports, infographics, charts, and maps on our newly redesigned website.

Fiscal Year 2019-20 Highlights

Strategic Planning

Based on recommendations from a third-party risk assessment, updated the agency's organizational structure by consolidating the IT Section, Development staff, and Database Administrators within the Health and Demographics Division and positioning Compliance staff (privacy and security) under the Mapping and Operations Division. The agency also contracted with the Department of Administration for a Virtual Chief Information Security Officer who reports directly to the Executive Director. This structure will better leverage resources and improve information security decision making and communications.

Customer Focus

Released the Education Funding Model Report on the formula, assumptions, and funding options on October 3, 2019; the report was presented to the Senate Education Funding Reform Study Committee, school superintendents, school business officials, a college sponsored conference on education funding, and one local school district. The model has been presented to, and discussed

Continuous Improvement

RFA was awarded non-recurring funding in the General Appropriations Act of 2020 to support the development of a statewide aerial imagery program to support state and local government services. We initiated a procurement process in October 2019 through the State Fiscal Accountability Authority to select a vendor to begin capturing orthoimagery during the winter of 2019-2020. The contract was awarded to Kucera International, who successfully captured imagery for the entire state by March 2020. By June 2020, RFA verified that the first of seven geographic groupings of imagery collected and delivered by Kucera were well within required specifications based on national GIS standards. RFA anticipates the remaining groupings will be delivered by the fall of 2020 with similar results. The initial round of statewide imagery quality control should be completed by the end of calendar year 2020 and available for use by state and local governments, which is well beyond our initial goal of 30 percent project completion.

Workforce Development

Staff completed in excess of 1,800 hours of professional development.

Risk Assessment and Mitigation Strategies:

Many of RFA’s responsibilities involve providing information to the General Assembly and other state agencies to assist in more informed decision-making. For example, should the agency fail to adequately forecast the state’s revenue, there could potentially be a budget shortfall which would adversely affect the citizens of the state. Delayed or inaccurate fiscal impacts could lead lawmakers to pass legislation without fully understanding the actual expenditure and revenue impact. The occurrence of such event is unlikely provided the General Assembly continues to support the agency with the necessary funding and guidance.

RFA is also responsible for providing services that directly impact the citizens of the state. One example of this in the development and coordination of a plan to transition all of the local public safety access points (PSAPs) to NG9-1-1 services. Over the past decade, the technology for processing 9-1-1 calls has changed as analog (copper wire) lines are being replaced with internet protocol (IP) based communication paths. These IP networks allow for enhanced capabilities with resiliency to ensure multiple transmission paths for each call; redundancy to ensure multiple backup locations are available for each PSAP; location accuracy to ensure each call is routed to the appropriate PSAP; and expanded data delivery for citizens, including text, images, and video. In the event RFA could not partner with the contractor to assist the PSAPs in the transition at the state level, the level of service each local jurisdiction

could provide would vary greatly depending on funding and available expertise which could have a negative impact on the citizens. This will not be an issue as long as the current funding authorization remains available.

The agency provides many other services that are not specifically listed in our accountability report that impact the public and/or partners; many of these are through contracts with other state agencies. Examples of these initiatives include: technical lead for the state’s health information exchange (SCHIE); the development and support of a web-based case management system for Community Long Term Care; and the creation, maintenance, and analysis of an education and workforce integrated data system. The agency can continue to provide these services with adequate funding and authorization.
