## **AGENCY'S DISCUSSION AND ANALYSIS**

### **CLEMSON EXPERIMENT STATION** ([www.clemson.edu/cafls/research](http://www.clemson.edu/cafls/research))

The Experiment Station continues to work collaboratively to support research and outreach at our six Research and Education Centers (RECs) located across South Carolina. They are strategically located to conduct agricultural research in representative conditions of South Carolina's distinct soil and climate regions, directly benefiting producers in those areas. These RECs, collectively known as the Clemson Experiment Station, are part of a nationwide system of scientists working to improve the quality of life. The Experiment Station continues to provide comprehensive support and is committed to excellence in research with the goal of preparing the next generation of agricultural professionals and individuals with research possibilities; interacting, educating, and promoting an all-inclusive environment in support of individuals and agriculture not only in South Carolina but around the world.

As a leading land grant public research institution, Clemson University highlights its federal grant activities in this report. As in the past, there has been increased focus on integrating the Research and Education missions of the Experiment Station. We continue to highlight the increase in graduate students, many of them advised or co-advised by faculty located at the RECs. For FY 2023-24, the Clemson Experiment Station has been involved in multiple areas of research. These areas include but are not limited to the following:

**Agribusiness and Community Development:** Clemson University renewed our research project in the Science, Technology, Engineering and Mathematics (STEM) program. The main goals of this research are to create awareness and interest at the middle and high school levels for careers in the agricultural sciences, and to prepare students for academic success and professional pursuits. As a result, this will produce a sustainable supply of well-educated agricultural scientists, and to prepare and empower agricultural educators to effectively teach rigorous STEM content within the school-based agricultural education curriculum. This program continues to provide high-quality professional development programs for agriscience teachers in South Carolina. Laboratory investigations, lesson plans and materials were developed to focus on the STEM concepts that naturally occur in the field of plant science. The curricular materials are utilized to train secondary agriscience teachers in school-based agricultural education (SBAE) programs to effectively deliver inquiry-based instruction on concepts and better understand career opportunities related to the horticulture/floriculture industry. Both collaborative work among our multistate team of researchers and each members' individual areas of expertise in their respective areas have provided the foundation for many agricultural education programs to highlight and improve how their curriculum meets STEM learning outcomes, which increases the rigor and relevance of agricultural education nationwide.

**Agrisystems Productivity and Profitability:** US broccoli production is unique, with 50% of the broccoli consumption along the East Coast, but being grown on the West Coast. This requires broccoli to be transported to Eastern states. With water rights and land leasing issues and with increasing fuel costs, the current US broccoli model is not sustainable long term. Clemson has helped lay the groundwork for continuing to move the broccoli industry forward in SC. With breeders at the national level with the USDA, state level at land grant universities and private industry breeders, broccoli germplasm has been developed and released that has led to an increase of roughly \$100 million in sales. This research led to the creation of new broccoli hybrid cultivars that were developed and tested in environmentally stressful locations. The public benefited by having new genetically and climate stable germplasm available that can be grown across the entire eastern US at various times throughout the year to maintain a steady supply to the market, offsetting an increased transportation carbon footprint and increased associated costs. This research will continue to bridge the gap between market shortfalls and the self-sustaining model of the private sector, for continued food security and economic benefit.

Scientists addressed issues related to row and specialty crop monitoring for yield estimation, quality assessment, disease detection, irrigation scheduling, and prediction of nutrient concentrations. The major activities include the use of aerial and ground-based sensing systems for assessing aboveground biomass on forage crops, and irrigation decision support system development for cotton. Additionally, we are exploring the use of spectrometers to assess moisture content and major nutrients of forages. The spectrometric measurements are being conducted on collected crop samples and artificial intelligence algorithms are being tested for predicting crop nutrients. Several aerial and ground-based prediction equations were evaluated for aboveground biomass estimation of forage crops along with various sensing mechanisms mounted on a ground rover. The developed methods will help livestock producers improve their resource utilization which in turn would improve efficiency, productivity, and production costs.

**Environmental and Natural Resources Conservation:** Clemson scientists investigated how active forest management impacts environmental variables such as fuel accumulation, vegetation, water quality, and erosion to help forest managers

<b>AGENCY NAME:</b>	<b>Clemson University - PSA</b>		
<b>AGENCY CODE:</b>	<b>P200</b>	<b>SECTION:</b>	<b>045</b>

better implement policies and best management practices. Additionally, it addressed how fire - alone or in combination with other management practices - may alter the storage, reactivity, and mobility of mercury (Hg) and carbon. Researchers collected data from various sites across the Southeast and conducted lab analyses on collected samples. New research focuses on the effects of wildfire severity and post-fire precipitation on the fate and transport of pyrogenic organic carbon and nitrogen in terrestrial-aquatic interface. Landowners, state and federal agencies, scientists, and non-profits have benefited from the dissemination of our research findings. These benefits are reciprocal as it has strengthened our relationships with partners in ways that will lead to future opportunities for collaboration. As demand for forest products increases, the potential for ecological degradation and the need for ecological restoration follows. Sharing our findings with landowners will enhance their ability to make sound forest management decisions and will be the ultimate beneficiary, since clean water and healthy soil are two of the most important ecosystem services that forests provide. A systematic conservation planning process was also initiated for the 17,500-acre Clemson Experimental Forest, with the goal of securing its functions as a core area of relatively undisturbed forest and managed pine in a rapidly urbanizing landscape. Clemson Researchers are conducting a 4-year study of the ecological impacts of Climate Smart Forestry, as part of the \$70 million partnership between the USDA, Clemson, and South Carolina State University.

**Food Safety, Security and Nutrition:** The Clemson Experiment Station addresses several areas of Food Safety including those related to fresh produce, poultry meat/eggs, and human exposure to pathogenic bacteria and viruses. Fresh fruit processing is done through a series of steps such as washing, waxing, drying, sorting, and packaging. The lack of available water for microbial growth would prompt the hypothesis that the dry conditions can help eliminate foodborne pathogens that are microorganisms of concern for the fresh produce industry. Results from this research indicate that pathogens can survive for an extended time in relative humidity as low as 25%. The potential for cross contamination in food pantries also determined the potential for transfer of bacteria during handling of food at food pantries. Various groups were made more aware of food safety issues and ways the food system is being made safer.

Heat stress during the reproductive stages of bean development can have a negative impact on production reducing yield and quality of pods and beans. Breeding heat tolerant snap bean and lima bean cultivars could extend the growing season, expand production areas, and increase resilience to fluctuating temperatures but is limited by a lack of genetic knowledge and large-scale germplasm screenings. Scientists screened a diverse panel of snap bean and lima bean accessions under heat stress conditions in summer field trials and will use the most heat tolerant germplasm to initiate a plant breeding program to develop new bean cultivars resilient to temperature fluctuations. The team evaluated over 400 SC heirloom and accessions of lima beans in a field trial. Evaluated traits include yield, disease symptoms and severity, flowering date, and plant architecture. Various varieties were evaluated for additional traits in spring, summer and fall field trials and will be crossed to initiate the snap bean heat tolerance breeding program. Growers, processors, and Extensions agents were able to see the pod production variation under variable growing conditions. Growers will ultimately benefit through the availability of improved snap and butter bean varieties, and snap bean researchers will benefit from the release of the genotyping data of the snapbean accessions.

**Risk Assessment and Mitigation Strategies for Clemson Experiment Station:** The Clemson Experiment Station conducts research on the main campus at Clemson University and on each of the six Research and Education Centers across the state that benefits South Carolina agriculture and natural resources. Failure to fulfill our research mission would result in decreased public opinion regarding our research program, decreased research funding levels to continue support of our mission, and dramatic impacts on multiple stakeholder issues. These issues include agriculture and forest productivity and profitability, and research-based recommendations that affect water quality and environmental sustainability through policies or on-farm practices. If Clemson is unable to fulfill our research mission, some of these impacts could be partially mitigated via collaborations with neighboring Land Grant institutions. However, full mitigation is likely impossible.

**CLEMSON COOPERATIVE EXTENSION SERVICE** ([www.clemson.edu/extension](http://www.clemson.edu/extension))

Clemson Cooperative Extension Service is proud to serve the citizens of South Carolina in the areas of agronomic crops, agribusiness, agricultural education, food systems and safety, forestry and natural resources, horticulture, livestock and forages, rural health and nutrition, and 4-H youth development. During FY23-24, Clemson Cooperative Extension Service directly served 198,221 stakeholders through 7,147 programs and workshops. While all efforts undertaken by Clemson Cooperative Extension Service staff were impactful, we highlight efforts in each program area.

**4-H Youth Development:** 4-H Youth Development Agents have led efforts to impact youth in the areas of STEM education and healthy lifestyles. Of the agents reporting impacts on their programs, youth acquired new knowledge and

<b>AGENCY NAME:</b>	<b>Clemson University - PSA</b>		
<b>AGENCY CODE:</b>	<b>P200</b>	<b>SECTION:</b>	<b>045</b>

skills, gained self-confidence, improved eating habits, and increased their physical activity. Some of the programs offered included the 4-H Embryology to Educate project, School Gardening, 4-H Healthy Lifestyle, 4-H Physical Activity, National 4-H Military Partnership, and county livestock shows. One unique program was the use of horses in a local youth home. The youth spend one day a week for a year paired with a horse that helps them learn problem solving and communication skills. While students are taught skills such as basic grooming, riding, and horse safety, some students have been observed telling the horses about their darkest days – providing a mental health benefit for students. Other programs such as Chicken Embryology teaches youth about science while providing a platform for learning about responsibility. 4-H Agents also plan and implement livestock and poultry shows for youth in their areas.

**Agribusiness:** Agribusiness has increased around forty percent over the last decade, bolstering nearly \$51.8 billion in economic impact for the state of South Carolina. Educational programs, technical assistance, and support for farming operations and agriculture are essential to sustain this economic growth in our state.

The Clemson Extension Agribusiness Team helps to facilitate this growth by offering guidance and education on applying business and economic principles to make informed decisions related to agriculture, natural resources, and community development. The Agribusiness team served 4,701 farmers and producers across the state in 196 programs. The team equips agribusinesses, commercial farmers, small and beginning farmers, lenders, and agricultural professionals with vital programs and decision-making tools. These topics include enterprise budgeting, tax education, market outlooks, farm financial analysis, development of farmers markets and agritourism, entrepreneurship training, business planning, and risk management education.

The SC New and Beginning Farmer Program illustrates another critical impact of Clemson Extension's support. This program equips new farmers with the necessary knowledge and skills to overcome initial challenges and build successful agricultural businesses. With over 1,700 attendees over the past 3 years, graduates of the program report significant improvements in their farming practices and business management, showcasing the program's effectiveness in fostering new talent within the industry.

Women in agriculture have made significant strides in South Carolina, with their representation increasing from 14% to 22% between 2017 and 2022. Clemson Extension has played a vital role in this growth by providing targeted support and resources through programs such as the SC Women in Agriculture Network (SC WAgN). SC WAgN membership has seen an impressive 947% growth from 2020 to 2024. These initiatives offer education on diverse topics, including farm safety, business management, and mental health, empowering women to take on more active and leadership roles in the agricultural sector. This support underscores Clemson Extension's commitment to fostering inclusivity and diversity within the industry.

**Agricultural Education:** The purpose of the Agricultural Education program is to empower South Carolina learners' agricultural education to be productive community leaders. Data for FY 23-24 were not reported.

**Agronomic Crops:** The Clemson Extension Agronomic Crops Program Team provides information on crop production that enables row crop producers to improve the sustainability of farming operations. In FY 2023-2024 the Agronomic Crops team offered programs, workshops, and on-farm site visits to farmers across SC. Topics taught included crop production for cotton, sesame, peanuts, soybeans, corn, and small grains. Sesame production in SC is an emerging market and Agronomic Crop Agents helped to organize workshops that informed farmers about planting rates, timing of planting, row width, pesticide options, and harvesting issues. Sesame is a good crop option because it can be grown on less than ideal land, has lower input costs, later planting dates, and is not browsed by white-tailed deer. Training on Dicamba was offered so this critical herbicide could be purchased and utilized by farmers with cotton and/or soybean crops. Additional training was also offered in the areas of insect scouting, peanut harvesting, cotton issues, and small grain production.

**Expanded Food and Nutrition Education Program:** The mission of EFNEP is to assist low-income families with children and youth in acquiring the knowledge, skills, attitudes, and changed behavior necessary for nutritionally sound diets and to contribute to their personal development and the improvement of the total family diet and nutritional well-being. Data for FY 23-24 were not reported.

**Food Systems and Safety:** The Centers for Disease Control and Prevention estimates that one in six Americans get sick yearly from a foodborne illness. From 2018-2021, there were 35 reports of foodborne illness outbreaks in SC originating from retail food establishments resulting in 3,166 foodborne illnesses, 394 hospitalizations, and five deaths. There were an additional 12 foodborne illness outbreaks originating from homes that resulted in 1,952 foodborne illnesses, 416 hospitalizations, and four deaths. The Clemson Extension Food Systems and Safety Program Team works to provide

<b>AGENCY NAME:</b>	<b>Clemson University - PSA</b>		
<b>AGENCY CODE:</b>	<b>P200</b>	<b>SECTION:</b>	<b>045</b>

training in safe food production for consumers, retail workers, manufacturers, and growers. The team offered workshops and trainings in pressure canning, pickling, jams and jellies, SC Food & Cosmetic Law, SC Egg Law, and ServSafe.

The SC Master Food Preserver program teaches participants how to properly can with the expectation that they will volunteer to educate others on safe home canning techniques. Food safety at locations such as churches, food banks, soup kitchens, etc. is often overlooked. To fill this gap, Extension Agents taught the Food Safety for Gatherings program to local churches that have soup kitchens. Further, the ServSafe Manager Certification program was taught that provides retail food employees with food safety principles.

**Forestry and Natural Resources:** Forestry in SC is a \$23.2 billion industry. Forests provide products, income, aesthetics, recreation, wildlife habitat, ecosystem services and clean water. Further, water quality is becoming increasingly important as SC’s population continues to increase faster than any other state in the nation. The goal of the Clemson Extension Forestry and Natural Resources Program Team is to provide educational opportunities to South Carolinians to manage both forests and water resources. Programs such as Woods in Your Backyard helped provide smaller forest landowners with strategies to improve the health, biodiversity, and wildlife habitat already present on a landowner’s property. Extension Agents also supported multiple County Forest Landowner Associations through the state. A New and Beginning Forest Landowner program was developed that connects inexperienced and new forest landowners with forestry professionals to provide a baseline of forest health and management information.

While forests help protect water quality, other water resources issues emerge that requires more direct management and action. To address these issues, Clemson Extension Water Resources Agents provided programming such as stormwater management, septic tank maintenance, and agricultural water usage. One program that is imperative is the Center Pivot Irrigation Test which determines the uniformity of water output and provides recommendations for adjustments to optimize water usage. Another important program is “Be Septic Safe” that helps residents on septic systems to maintain them but to also identify failures so they can be quickly addressed. A water quality issue that is likely overlooked is goose management. Therefore, a goose management program provided management strategies to prevent geese from inhabiting ponds permanently and creating pollutant loads that are harmful to ponds and water quality.

**Horticulture:** Clemson Extension’s horticulture programs play a crucial role in strengthening South Carolina’s state economy by supporting both commercial growers and home gardeners. The expertise provided by Clemson Extension Horticulture Agents spans a wide array of topics, including fruits and vegetables, landscape, turf, ornamental plants, and issues related to both home gardening and commercial production.

Programs such as the Carolina Lawn Management Training had a significant impact on the \$3 billion turfgrass industry by promoting sustainable lawn care practices. Additionally, events like the Midlands Vegetable Grower Meeting equipped farmers with essential knowledge on pest management and sustainable cultivation, benefiting numerous growers and enhancing their productivity and profitability.

The Carolina Yards program exemplified the Clemson Extension’s commitment to environmentally friendly practices. Between July 2023 and June 2024, 73 yards were certified as Carolina Yards. Participants in this program learned vital techniques in soil health, invasive species removal, efficient fertilizer use, and water conservation, leading to enhanced environmental quality and sustainable landscaping practices throughout the state.

The Home & Garden Information Center (HGIC), Clemson University’s most visited webpage, highlighted the high demand for gardening and landscaping resources. The HGIC provided comprehensive information on soil health, crop selection, planting schedules, and pest management. Clemson Extension’s educational programs empowered home gardeners with the skills needed to create productive and sustainable gardens, particularly benefiting those in food deserts and contributing to the local economy by encouraging homegrown produce. The Master Gardener program is a cornerstone of Clemson Extension’s outreach, providing invaluable community service and education. Volunteers assist homeowners with gardening and landscaping questions and promote best practices in horticulture.

Clemson Extension’s horticulture programs are crucial for driving economic growth in South Carolina by enhancing the profitability and sustainability of horticultural practices. These efforts ensure that the state’s horticultural industry remains robust, supporting both commercial agriculture and individual gardeners, and significantly contributing to the state’s economic health.

**Livestock and Forages:** The Livestock and Forages Program Team strives to educate animal agriculture and forage producers to increase environmental sustainability, production, and profitability by providing unbiased scientific information. One important program taught was Confined Animal Manure Management (Camm), which is a certification program designed to meet SC Regulation R.61-43 requirements. The Camm program provided certification or re-certification for 707 farmers/producers. Another program coordinated by a Livestock and Forage Extension Agent was the off-farm, truckload feeder cattle sale that helps to maximize market prices for smaller producers. Thirteen area farmers

<b>AGENCY NAME:</b>	<b>Clemson University - PSA</b>		
<b>AGENCY CODE:</b>	<b>P200</b>	<b>SECTION:</b>	<b>045</b>

sold 680 head of feeder calves (10 loads). This sale resulted in \$0.42 per pound higher price when compared to traditional markets, yielding increased average earnings of \$13,234 per farm. Other topics such as summer pasture management, the Backyard Livestock Production program, and farm safety were also taught throughout the year.

**Rural Health and Nutrition:** Six in 10 South Carolina (SC) adults are diagnosed with a chronic disease. SC has the 12<sup>th</sup> highest rate of diabetes in the nation. Chronic diseases impact the quality of life and financial burdens across all demographic sectors, especially those with lower incomes and health-related resources. The Clemson Extension Rural Health and Nutrition Program team provides programming and outreach efforts to directly improve the quality of life for those diagnosed with chronic health disease. A signature program offered is Health Extension for Diabetes, which educates participants on lifestyle changes to better self-manage their diabetes. This program was offered in English and Spanish to better serve the Hispanic community in SC. Another impactful program is Know Diabetes by Heart, which increases awareness surrounding the link between diabetes and heart-disease. Further, they offer Diabetes Self-Management Support classes to help people diagnosed with Type 1 or Type 2 diabetes. The Clemson Extension Rural Health and Nutrition Program also provides programs to increase physical activity, healthy cooking, and school gardens.

**Risk and Mitigation Strategies for Clemson Cooperative Extension Service:** Clemson Extension’s mission is to improve the quality of life for all South Carolinians through education. The impact on the public if Clemson Extension is unable to fulfill its mission would be: 1) economic downturn for agricultural and forestry clients, 2) loss of guidance for agricultural and forestry production, 3) loss of licensure for private and commercial pesticide applicators, 4) loss of agricultural tax credits for CPAs, 5), loss of emergency preparedness for natural disasters, 6) loss of rural health and wellness, and 7) loss of life skills development for youth. Partnerships with surrounding states to provide educational services would be a possible mitigation strategy in the unlikely event Clemson Extension cannot fulfill its mission.

**REGULATORY SERVICES** (<https://www.clemson.edu/public/regulatory>)

Regulatory Services protects the state from exotic and invasive species, ensures that pesticides are used safely and according to state and federal law, regulates the structural pest control industry, verifies that fertilizer and lime meet standards and labeled guarantees, conducts programs for seed and organic certification, provides diagnosis of plant pests, soil and other agricultural related lab analyses, and ensures readiness to respond to a catastrophic event impacting the state's agriculture. The impact on the public if Clemson Regulatory Services is unable to fulfill its mission would be: 1) an increased risk to environmental and human health from potential pesticide misuse, 2) loss of productivity for growers due to poor fertilizer quality or a lack of soil nutrient testing, 3) increased risks from plant insects or diseases due to reduced plant pest identification, monitoring, and control programs in agriculture, forestry, and the plant nursery industry, 4) loss of emergency response for natural disasters under the state ESF-17 Plan.

Continued funding from the SC General Assembly for recurring and non-recurring program needs will ensure that Regulatory Services will be able to continue to meet our state and federal program requirements and protect South Carolina agriculture.

**Agriculture Services Lab:** If the Agriculture Services Lab (ASL) were no longer able to function, the agricultural and horticultural communities would not have a cost-effective agricultural testing laboratory within SC to ensure nutrient content and management for crop production. Additionally, testing required for permitting of agricultural animal facilities and land application of solid waste could not be completed in SC. Researchers from universities, state and federal agencies, and industry would not have access to this reliable and affordable analytical testing lab.

**Fertilizer Regulatory and Certification Services:** Fertilizer Regulatory and Certification Services regulates the manufacture, label, registration, and content of fertilizers, liming materials, and soil amendments, as well as administers the Certified Seed/Turfgrass program and assists with the solar pollinator program statewide. Without the oversight of FRCS, consumers would not have protection from purchasing inadequate agricultural fertilizers and liming materials, and the public would be endangered by unregulated sales of explosive fertilizer materials, like those used in the Oklahoma City bombing. Furthermore, negative economic impacts would occur from the loss of certified seed/turfgrass crops. The solar pollinator program helps provide habitat for pollinators and assorted wildlife. If FRCS could not continue to conduct these programs, other agencies such as the South Carolina Department of Agriculture, the South Carolina Department of Health and Environmental Control, Homeland Security, and the SC Department of Natural Resources could assist.

**Department of Pesticide Regulation:** The Department of Pesticide Regulation (DPR) is the Regulatory Agency for all Pesticide Laws and Programs in South Carolina. One of these programs is the Federal Worker Protection Standard

<b>AGENCY NAME:</b>	<b>Clemson University - PSA</b>		
<b>AGENCY CODE:</b>	<b>P200</b>	<b>SECTION:</b>	<b>045</b>

Regulation (40:CFR 170), which DPR contracts with EPA to implement and enforce in South Carolina. This regulation is critical to ensure the health and safety of agricultural farm workers and agricultural growers in South Carolina.

It would be detrimental to the safety and well-being of South Carolina's agricultural community if DPR investigators were unable to inspect these operations (farms, forests, nurseries, and greenhouses) to ensure pesticides are applied properly and documented appropriately; agricultural growers and workers are protected from pesticide exposure; pesticide safety training is conducted and proper personal protective equipment is available and utilized by applicators, pesticide handlers and agricultural workers.

Another program that the DPR contracts with EPA is the Integrated Pest Management (IPM) in Schools program. This program deals with pesticide use and safety in our public-school systems. This program educates public school systems on how to handle pest management and chemicals properly and safely around school children and school staff. The inability of investigators to inspect and educate these school systems could lead to the possibility of pesticides not being used in the safest and least contact manner in our public-school systems.

DPR also contracts with EPA regarding the inspection of companies that produce or repackage pesticide products in South Carolina. Specially trained inspectors routinely inspect these companies to ensure they are producing or repackaging pesticide products that are properly registered with EPA and the SC DPR. Misbranded, illegal pesticide products and products that could cause harm to humans, animals, and the environment could be produced and released to the public if DPR inspectors were not allowed to conduct these inspections across the state.

The Department of Pesticide Regulation handles the approval of all continuing certification programs for the recertifying of licensed pesticide applicators in the state of South Carolina. These recertification programs are necessary to ensure pesticide applicators continue their training of new pesticide products, labeling changes, and pesticide use. If the recertification approval program was eliminated and training programs were not available, then the state could see pesticide misuse situations increasing such as pesticide drift, poisonings, health issues, and overall adverse effects on humans and the environment.

**Invasive Species Program:** The invasive species program within the Department of Plant Industry manages and conducts early detection surveys for invasive plant pest species that pose a threat to South Carolina agriculture and natural resources. The program implements quarantines, uses surveys to monitor pest populations, and applies treatments to contain or eradicate plant pests. If these surveys were not carried out to detect potential invasive plant pests or to identify and treat currently infested sites, the South Carolina agricultural industry would face a greater risk from undetected pest problems and/or closed interstate and international markets. Other states and countries often prohibit commodities and products without verification of pest freedom, as provided by survey results and treatment reports obtained by plant pest regulatory agencies. If Clemson's Department of Plant Industry could not carry out these surveys and treatments, the risk of pest damage to South Carolina's agricultural industry and the environment would be increased.

**Apiary Program:** The Apiary Inspection Program (AIP) works closely with Clemson's Extension Apiculture Specialist, the South Carolina Beekeepers Association, the South Carolina Farm Bureau Apiculture Committee, the Apiary Inspectors of America, and local beekeepers' associations in SC. The AIP Manager attends regularly held meetings and is frequently asked to speak and present on honeybee-related topics. Much of this work is outreach and education. However, inspections, certification of honeybee shipments, and response to honeybee pests are critical parts of this program. If the AIP within the Department of Plant Industry (DPI) were unable to complete these duties, the beekeeping industry would lose a partner to conduct inspections, collect diseased samples, and assist with import and export requirements. This loss would have a negative impact on the beekeeping industry in South Carolina. The API also leads the Yellow-legged hornet survey and eradication efforts. Populations of this invasive hornet, native to Asia, have only been documented in North America in and around Savannah, GA. This includes Jasper and Beaufort counties in SC. Program staff have secured significant grant funding, staffing, and expertise needed to prevent yellow-legged hornet establishment in South Carolina.

**Asian Longhorned Beetle Program:** The South Carolina Asian Longhorned Beetle (ALB) Eradication Program was formed in collaboration between Clemson University Department of Plant Industry (DPI) and the United States Department of Agriculture (USDA) on June 11, 2020, in response to the confirmed detection of ALB in Hollywood, SC. The ALB Program, funded through cooperative agreements with USDA in place since September 1, 2020, works to eradicate ALB from the state of South Carolina through multiple operation areas including survey, regulatory enforcement, tree removal, and outreach. The ALB Program primarily works in Charleston County, but some operations occur as needed in other counties statewide. During FY23-24, the ALB Program surveyed 159,493 host trees, with 3,037 new detections inside the quarantine area. Tree removal eliminates the opportunity for the beetle to spread, and in FY23-24, the ALB Program removed 813 infested trees and 4,759 high-risk host trees. During FY23-24 the ALB Program met with entities working with regulated articles resulting in 51 compliance trainings, 24 new compliance agreements and executed

<b>AGENCY NAME:</b>	<b>Clemson University - PSA</b>		
<b>AGENCY CODE:</b>	<b>P200</b>	<b>SECTION:</b>	<b>045</b>

19 renewals. The ALB Program proactively educates the public about ALB and maintains good relationships with community stakeholders. The ALB Program developed and distributed printed outreach materials to property owners, residents, agencies, community groups, and organizations. During this period the ALB Program attended more than 66 organized events to share information and distribute outreach materials to approximately 13,600 stakeholders. Managerial work included managing \$6.5 million in federal funding and solicit for \$3.6 million in cooperative agreement funding through the USDA, maintain a Memorandum of Agreement with College of Charleston and USDA to utilize 1.5 acres of land for an ALB Program office, purchase equipment and supplies to support program activities and hire three people to maintain a team of ten full-time dedicated ALB Program staff.

**Organic Program:** During the reporting period, the Organic Certification Program offered certification under the following scopes: Crop, Livestock, Processing, and Wild Crop. The Organic Certification Program reports 74 operations, of which 11 carried more than one organic certification scope (meaning some combination of Crop and Livestock and/or Crop and Processor, or all three). For all 74 operations to complete the certification process, the program had to perform over 350 certification activities, such as organic system plan reviews, material input reviews, annual inspections, unannounced inspections, investigations, and compliance audits. The program completed the reinstatement process for one operation, received five surrenders of certification, and issued one non-compliance.

Additionally, this year, the program worked to implement the Strengthening Organic Enforcement rule. This resulted in form, policy, and quality system updates, as well as extensive training and outreach to the industry. The program also participated in the Transition to Organic Partnership Program (TOPP), a \$50,000 cooperative agreement with USDA that supports funding for farmer-to-farmer mentoring, technical assistance and training, community building, and workforce training and development.

“What-if” the Organic Program was unable to operate: The Organic Certification Program provides South Carolina Agribusiness with an optional value-added USDA endorsed certification that is local, affordable, non-biased and meets the USDA’s National Organic Program Standards. If we were unable to provide these services for any reason, the South Carolina Organic Industry would have to seek out-of-state certification providers at a higher cost. The state would no longer have an agency working to protect organic integrity on South Carolina’s behalf. The cost of organic goods could rise and producers would lose connectivity to other Clemson programs that support organic production practices. Additionally, the National Organic Program just released its ruling regarding Strengthening Organic Enforcement, which will impact all aspects of the organic supply chain. The Clemson Organic Certification Program strives to build and improve the organic community in South Carolina to educate the public, offer certification to impacted community members, and provide overall clarification regarding compliance with the new regulations.

**Plant Pest Diagnostic Clinic:** The Clemson University Plant and Pest Diagnostic Clinic (PPDC) of the Department of Plant Industry Labs Program is the state lab dedicated to handle all plant diagnostic samples in SC. PPDC is a member of the National Plant Diagnostic Network (NPDN), an internationally respected consortium of plant diagnostic laboratories. It receives samples from the Clemson Cooperative Extension Service offices, homeowners, farmers, landscapers, turfgrass management professionals, and researchers. PPDC also aids in the detection and documentation of new plant diseases and pests of regulatory concern in South Carolina. In the calendar year of 2023, the PPDC processed 1207 samples, which represented a 19% increase compared to 2022. The vast majority of the samples (94%) were received from 44 counties of South Carolina. The remaining 75 samples came from 18 other U.S. states. Risk assessment and mitigation strategies for the PPDC: Dr. Xiao Yang is the Lead Diagnostician and Manager of the PPDC. Jordan Withycombe and Dr. G. Curt Coburn will serve as the back-up diagnosticians when Dr. Yang is on leave. It is unlikely while if all diagnosticians cannot perform the diagnostic duties due to any reasons, samples will be forwarded to other NPDN diagnostic labs in other states under the coordination of the network to continue serve the clients and mitigate any negative impact on the public.

**Nursery Program:** The 2023 Nursery Inspection year began with losing three Nursery Inspectors between January and March. These positions were not refilled until the June 1, 2023, when three new employees were hired. Despite the absence of a full staff, all required Nursery Inspections were conducted and found in compliance. Nursery Inspectors work throughout the year to provide certification of live nursery stock being sold in and out of South Carolina. The certification is to attest to the relative freedom of pests and diseases. Nursery Inspectors also work with the Invasive Species program to assist with conducting various surveys throughout South Carolina to detect any pests, weeds and/or insect species that can cause harm to South Carolina’s agriculture and environment. A total of 607 Nursery Grower Inspections and a total of 288 Nursery Dealer Inspections were conducted in 2023.

<b>AGENCY NAME:</b>	<b>Clemson University - PSA</b>		
<b>AGENCY CODE:</b>	<b>P200</b>	<b>SECTION:</b>	<b>045</b>

**Regulatory Special Investigation Unit (SIU):** SIU handles all criminal investigations in Regulatory Services of both state and federal law. In the event we could not carry out our duties, we could not protect SC citizens and industries, or honor our federal mandates. Recently, the US EPA began requiring all state pesticide regulatory programs to have criminal authority in the state laws.

**LIVESTOCK POULTRY HEALTH** ([www.clemson.edu/public/lph](http://www.clemson.edu/public/lph))

**South Carolina Meat-Poultry Inspection Department (SCMPID):** SCMPID completed its triennial on-site assessment by the USDA Food Safety Inspection Service and continued to be designated as the “at least equal to”. This review, in addition to annual virtual reviews, is to ensure a safe, wholesome, properly labeled meat and poultry supply. The South Carolina program continues to meet or exceed the federal requirements. Department activities included 100% online inspection on 1,251 slaughter days during slaughter operations that processed 28,903 livestock and more than 2 million poultry. Additionally, the department performed 33,555 individual inspection procedures during 7,311 inspection days in 74 slaughter and processing establishments served.

If SCMPID was unable to meet its goal and objective of protecting the health of consumers by providing a comprehensive inspection service to ensure safe, properly labeled, wholesome meat and poultry products through inspections and regulation in state and federal cross-utilization meat and poultry plants, then unsafe, improperly labeled, and unwholesome meat and poultry products could enter commerce and potentially be consumed by citizens of South Carolina. This could lead to food-related illness and even death from consuming these products. If this were to occur, outside assistance from the South Carolina Department of Public Health, South Carolina Department of Agriculture, and USDA Food Safety Inspection Service (USDA FSIS) will most likely be required. These agencies could assist with additional inspection personnel, information-gathering capacity, and access to additional resources.

To help resolve the issue before it became a crisis, the General Assembly could increase funding *for SCMPID general operating costs to fill the deficits created by cuts in federal USDA FSIS grants*, temporarily authorize paid overtime, make additional state funds available to cover this overtime and allow and streamline the hiring of short time temporary staff.

**Clemson Veterinary Diagnostic Center (CVDC):** Potential Risk and Negative Impact: *Not being able to provide diagnostic, regulatory, and surveillance testing services meeting the South Carolina animal industry’s increasing testing requirements for national and international trade or during a catastrophic event would negatively impact animal health, movement, trade, food safety, and public health.*

Mitigation strategies:

1. Identify other State or veterinary diagnostic labs to outsource testing temporarily, until the lab is functional.
2. Procure and set up a mobile lab to provide testing for high-priority samples.
3. *Provide emergency funding during a catastrophic event.*
4. *Request the General Assembly to provide the CVDC additional funds to upgrade the laboratory’s physical structure and increase testing capabilities to meet South Carolina’s animal agriculture needs to remain competitive in national and international trade.*

One thing to consider is ‘necropsy of animals’. In this situation, a large dead animal can’t be shipped to another lab and clients will no longer have access to necropsy services. One solution could be encouraging veterinarians to perform field necropsies and share pictures with pathologists for consulting. Tissues can be sent to other labs for histopathology and other required tests.

Requests for the General Assembly:

1. *Immediate emergency funding during a catastrophic event.*
2. *Provide the CVDC additional funds to upgrade the laboratory’s physical structure and increase testing capabilities to meet South Carolina’s animal agriculture needs.*
3. Possible compensation to veterinarians to encourage field necropsies of dead animals.

**Animal Health Programs (AHP):** Potential Risk and Negative Impact: South Carolina has a robust poultry and livestock industry. The poultry processing and poultry and egg production account for approximately \$3.51 billion in the direct economic output of South Carolina.<sup>1</sup> Last year, the Animal Health Programs *investigated eight possible reported foreign animal disease investigations* and responded to three foreign animal disease cases (*three cases of highly pathogenic avian influenza H5N1 in non-poultry (backyard) flocks in Horry, Orangeburg, and Richland Counties*).

<sup>1</sup> Joseph C. Von Nessen, PhD, SCDA - *The Economic Impact of Agribusiness in South Carolina and the Certified South Carolina Grown Program*, February 2022, 5.

<b>AGENCY NAME:</b>	<b>Clemson University - PSA</b>		
<b>AGENCY CODE:</b>	<b>P200</b>	<b>SECTION:</b>	<b>045</b>

The potential risks of not being able to perform animal disease investigations, animal disease responses, animal disease traceability, and livestock market inspections in a catastrophic event will negatively impact the state's public and animal health which may end up with mass animal carcass issues, animal movement, national and international trade, food safety and availability, and disrupt the commercial industry and state's economy.

**Risk assessment and mitigation strategies:** Pending the cause of the catastrophic event, mitigation strategies may include:

1. Communicate with veterinarians and the commercial animal industry stakeholders for disaster and disease preparedness.
2. Work with emergency management and other external stakeholder groups to develop teams for preparedness and response.
3. Identify neighboring state and federal agencies to request trained personnel for assistance.

Minimal requests will be made to the General Assembly for:

1. Immediate emergency funding to assist in relief and response efforts.
2. Overtime and appropriate compensation for responders assisting with the event.

Melissa	Kelley	Chief Financial Officer and Director of Business Office	melissk@clemson.edu	864-656-5273

#### Agency Mission

**Adopted in:**

**2014**

Clemson Public Service and Agriculture (PSA) is a state agency comprised of four units: Clemson Experiment Station, Clemson Cooperative Extension Service, Livestock and Poultry Health, and Regulatory Services. Clemson PSA safeguards the health and safety of livestock, poultry and companion animals and protects the food supply and public health of South Carolinians through its Livestock Poultry Health division, while PSA's Regulatory Services division ensures the safe, effective use of fertilizers and pesticides, and the quality of seeds and plants grown in the state and conducts programs that prevent agroterrorism. Clemson PSA works collaboratively with Clemson's College of Agriculture, Forestry and Life Sciences to conduct research and outreach through the Clemson Experiment Station and Clemson Cooperative Extension Service.

#### Agency Vision

**Adopted in:**

**2014**

To be acknowledged as the foremost provider of practical new discoveries, outreach and education, and technical assistance in the areas of agrisystems productivity and profitability, agribusiness, environmental and natural resources, food safety and nutrition, and 4-H youth development to enhance the quality of life for South Carolina's citizens.

#### Recommendations for reorganization requiring legislative change:

None

#### Agency intentions for other major reorganization to divisions, departments, or programs to allow the agency to operate more effectively and efficiently in the succeeding fiscal year:

None

#### Significant events related to the agency that occurred in FY2024

Description of Event	Start	End	Agency Measures Impacted	Other Impacts
No significant events.				

Is the agency in compliance with S.C. Code Ann. § 2-1-220, which requires submission of certain reports to the Legislative Services Agency for publication online and the State Library? (See also S.C. Code Ann. § 60-2-20).

Yes

Reason agency is out of compliance: (if applicable)

Is the agency in compliance with various requirements to transfer its records, including electronic ones, to the Department of Archives and History? See the Public Records Act (S.C. Code Ann. § 30-1-10 through 30-1-180) and the South Carolina Uniform Electronic Transactions Act (S.C. Code Ann. § 26-6-10 through 26-10-210).

Yes

Does the law allow the agency to promulgate regulations?

Yes

Law number(s) which gives the agency the authority to promulgate regulations:

SC Code Sections 47-4-30; 47-6-30; 47-11-70; 47-11-150; 47-13-530; 47-13-810; 47-13-1230; 47-13-1315; 47-17-130; 47-19-170; 47-22-30; 46-7-10; 46-9-40; 46-10-30; 46-13-30; 46-21-625; 46-25-40; 46-26-30; 46-26-160; 46-37-20 and 59-119-50.

Has the agency promulgated any regulations?

Yes

Is the agency in compliance with S.C. Code Ann. § 1-23-120 (J), which requires an agency to conduct a formal review of its regulations every five years?

Yes

(End of Reorganization and Compliance Section)

## Strategic Plan Results

# FY2024

as submitted for the Accountability Report by:

P200 - Clemson University- PSA

- Goal 1** The Clemson Experiment Station aims to identify critical issues and find solutions through research that support South Carolina's agriculture and forest industries.
- Goal 2** The Clemson Cooperative Extension Service will improve the economy, environment, and well-being of South Carolinians through the delivery of unbiased research-based information and education.
- Goal 3** Clemson Livestock Poultry Health will ensure the continued health of the livestock and poultry industry, ensure safe, wholesome, properly labeled meat and poultry products, and protect the public health of the citizens of South Carolina.
- Goal 4** Regulatory Services protects the citizens of South Carolina and the environment by implementing legislatively mandated regulatory programs and by providing other essential programs and services for agriculture and related sectors and for homeowners.

Perf. Measure Number	Description	Base	Target	Actual	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes
<b>1.1 Enhance research prominence in focus areas that maintain and support the growth of South Carolina's agriculture and forest industries.</b>											<b>State Objective: Education, Training, and Human Development</b>			
1.1.1	The number of research proposals and funding requests submitted to granting agencies	388	250	451	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	INFO-ED	Clemson Server	Individual grant submissions are typically defined by input from multiple sources of stakeholders.	Stakeholders providing input for external grant submissions include commodity groups (i.e. SC Soybean Board), producer organizations (i.e. Farm Bureau) and individual producers.	3004.000000.000	
1.1.2	The number of research proposal funded extramurally	184	150	193	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	INFO-ED	Clemson Server	Basic research that identifies potential solutions to agricultural and forest industries challenges	Scientific community; Citizens of SC	3004.000000.000	
1.1.3	The number of technical contributions related to research	126	90	124	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	Experiment Station Data	Clemson Server; Experiment Station Office	Results of research disseminated to the scientific community for continued investigation and the transfer of technology to agricultural and forest industries.	Scientific community; Citizens of SC	3004.000000.000	
<b>1.2 Strengthen applied research through connections between Clemson University scientists and growers.</b>											<b>State Objective: Education, Training, and Human Development</b>			
1.2.1	Research proposals that respond to the needs of commodity boards	48	60	45	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	INFO-ED	Clemson Server	Crop specific commodity boards define research needs annually and calls for research proposals to address those needs.	Commodity boards are elected by South Carolina producers.	3004.000000.000	Continued reduction of sufficient calls from commodity boards due to lack of funding; therefore, we are not reaching our target with these entities.
<b>1.3 Improve undergraduate and graduate education experiences offered at RECs.</b>											<b>State Objective: Education, Training, and Human Development</b>			
1.3.1	Number of graduate students recruited and retained	394	150	410	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	Office of Institutional Research	Clemson Server; Office of Institutional Research	Research results and practices to improve production and/or reduce costs and environmental impacts of agriculture and forestry production.	Ag/forestry producers and industry representatives located in the region of the Research and Education Centers.	3004.000000.000	
<b>2.1 Develop and implement agricultural production systems that are economically sustainable and environmentally sound (Agrisystems Productivity and Profitability)</b>											<b>State Objective: Education, Training, and Human Development</b>			

Perf. Measure Number	Description	Base	Target	Actual	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes	
2.1.1	Number of acres in South Carolina impacted as a result of Extension programs.	866,343	300,000		0	Count	equal to or greater than	State fiscal year	# of acres impacted by Extension programs. The acreage may be impacted from improved practices, alternative crops planted, application of integrated crop management strategies and other land management strategies.	CUMIS	Clemson Extension Office	Education of producers and farmers to ensure economically sustainable and environmentally sound practices	Natural Resources	3504.000000.000	Did not collect data in FY 23-24
2.1.2	Percentage of producers implementing new practices learned for livestock and forage production	81%	50%		0%	Percent	equal to or greater than	State Fiscal Year	# of producers that self-reported implementation of a livestock/forage production practice. This may include implementation of breeding practices, recommended grazing management systems, establishment of improved forage cultivars, etc.	Clemson University Management Information System (CUMIS)	Clemson Extension Office	Implementation of methods taught that ensure economically sustainable and environmentally sound practices	Producers and farmers	3504.000000.000	Did not collect data in FY 23-24
<b>2.2 Agribusiness and Agricultural Workforce Development (Agribusiness)</b>											<b>State Objective: Education, Training, and Human Development</b>				
2.2.1	Number of people served through workshops, one-on-one meetings, online resources and other media outlets.	153,652	200,000		297,999	Count	Equal to or greater than	State fiscal year	# people served through direct and indirect methods.	CUMIS and SalesForce	Clemson Extension Office	Education of agricultural business entities to maintain or expand operations or to further develop the ag workforce	Agricultural business entities	3504.000000.000	
2.2.2	Percentage of people reporting a gain in knowledge from workshops	96%	75%		92%	Percent	equal to or greater than	State Fiscal Year	# of people that reported a gain in knowledge as a result of the workshops.	Clemson University Management Information System (CUMIS)	Clemson Extension Office	Change in knowledge to further agricultural business entities	Agricultural business entities	3504.000000.000	
<b>2.3 Conserve and protect all natural resources throughout South Carolina through education and implementation of best management practices (Resources Conservation)</b>											<b>State Objective: Education, Training, and Human Development</b>				
2.3.1	Percent of landowners, homeowners, land managers, biologists, engineers, water resources managers and private citizens utilizing practices taught during programs and workshops.	60%	50%		24%	Percent	equal to or greater than	State Fiscal Year	# of participants reporting that they implement knowledge divided by number of participants	Clemson University Management Information System (CUMIS)	Clemson Extension Office	Increase knowledge to protect and conserve natural resources	Landowners	3504.000000.000	Due to a transition in reporting systems, the low number is a result of under reporting from constituents.
2.3.2	Number of acres owned/managed potentially impacted by forestry and wildlife workshops and programs and acres impacted by Master Naturalist programs	85,769	150,000		11,766	Count	Equal to or greater than	State fiscal year	# of acres reported by program attendees and volunteers	CUMIS and Master Naturalist Volunteers	Clemson Extension Office	On-the-ground conservation of natural resources	Natural Resources	3504.000000.000	Due to a transition in reporting systems, staff under reported on acres associated with forestry and wildlife impact.
<b>2.4 Provide training on the safe preparation, production and handling of food while educating citizens on wise nutritional choices that leads to improved health (Food Safety and Nutrition)</b>											<b>State Objective: Education, Training, and Human Development</b>				
2.4.1	Estimated savings from potentially preventing food-borne illnesses in restaurants.	\$ 550,290	\$ 250,000	\$	417,690.00	Dollar amount	Equal to or greater than	State fiscal year	# establishments represented in programs teaching safe food preparation and handlings programs (from CUMIS) * \$6,630	CUMIS	Clemson Extension Office	Train restaurant and food workers in safe handling practices to protect food consumers from food-borne illnesses	Restaurants and food consumers	3504.000000.000	
2.4.2	Improve the quality of life for South Carolinians through increased physical and mental health in 5 rural counties.	4,925	4,000		7,082	Count	Equal to or greater than	State fiscal year	# people improving life and improved lifestyles through attendance at health and nutrition programs throughout SC	CUMIS	Clemson Extension Office	Improved quality of life through education on lifestyle and food habits	Rural county residents in SC	3504.000000.000	
<b>2.5 Empower youth to grow into healthy and productive members of society through hands-on, inclusive and mentored learning opportunities (Youth Development and Families)</b>											<b>State Objective: Education, Training, and Human Development</b>				

Perf. Measure Number	Description	Base	Target	Actual	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes
2.5.1	Potential future volunteer contributions (in dollars) by current 4-H members (projected 15 years into the future).	\$ 23,826,122	\$ 20,000,000	\$ 36,396,142.00	Dollar amount	Equal to or greater than	Other	(# 4-H members * Volunteer Hourly rate) * (Avg # Volunteer Hours for 4-H by adults) projected forward 15 years with an inflation rate of 2.5%	ES-237	USDA-NIFA	Community residents benefit through learned sense of volunteer and service by participation in 4-H programs and the future value of the learned service	Community members throughout SC	3504.000000.000	Assumed a 3% inflation rate when calculating the future value. The volunteer rate is from IndependentSector.com for South Carolina (\$29.95)
2.5.2	Percentage of 4-H members engaged in citizenship and community service programs.	85%	25%	11%	Percent	equal to or greater than	Other	Percentage of 4-H participants in citizenship programs divided by total 4-H participation	ES-237	USDA-NIFA	Community residents benefits from increased youth participation in community projects and leadership.	Community members throughout SC	3504.000000.000	The percentage from FY 22-23 should have been 8.5% and not 85%. Therefore, this percentage has increased and not decreased.
3.1	Enforce state and federal animal health laws and regulations by monitoring interstate movement of animals, performing inspections at livestock auction markets, and developing and expanding livestock traceability capability for livestock disease prevention, control, surveillance and eradication programs to protect animal and public										State Objective: Maintaining Safety, Integrity and Security			
3.1.1	Total number of new premises registered by Livestock Poultry Health	10,519	8,625	11,016	Count	Equal to or greater than	State Fiscal Year	Total premises registered	LPH reports	Clemson Livestock Poultry Health Office	Improves traceability of active livestock and poultry premises to help resolve animal disease outbreak events.	SC livestock and poultry producers.	2500.010000.000; 2501.050000.000	
3.1.2	Meet disease testing and trace back requirements for continued "disease free" status as specified in the code of federal regulations	100%	100%	100%	Percent Complete	Complete	State Fiscal Year	Disease testing requirements met to maintain status	LPH reports	Clemson Livestock Poultry Health Office	Maintaining state disease-free status allows livestock and poultry producers to export products for national or international sales without (or with less) regulatory restrictions.	SC livestock and poultry producers.	2500.010000.000; 2501.050000.000	
3.1.3	Number of inspections and investigations conducted at locations including livestock markets, exhibitions, sales, and on livestock farms throughout South Carolina	688	450	569	Count	Equal to or greater than	State fiscal year	Number of inspections, farm visits, and investigations	LPH Reports	Clemson Livestock Poultry Health Office	Maintaining state disease-free status allows livestock and poultry producers to export products for national or international sales without (or with less) regulatory restrictions.	SC livestock markets, and SC and interstate livestock producers.	2500.010000.000; 2501.050000.000	
3.2	Protect the health of consumers by providing a comprehensive inspection service to ensure safe, properly labeled, wholesome meat and poultry products through inspections and regulation in state and federal cross-utilization meat and poultry plants.										State Objective: Maintaining Safety, Integrity and Security			
3.2.1	Operate under "at least equal to" status from USDA Food Safety Inspection Service (FSIS)	100%	100%	100%	Percent Complete	Complete	State Fiscal Year	On-site triennial review by FSIS and desk review each of the two years in between	FSIS designation	FSIS and Clemson Livestock Poultry Health Office	Required under the Federal Meat and the Federal Poultry Inspection Act to operate as state inspected facility.	Livestock and poultry slaughter and processing plants	2500.010000.000; 2501.050000.000	
3.2.2	Percent of state permitted fully inspected establishments with two in-depth reviews completed	100%	100%	100%	Percent	Equal to or greater than	State Fiscal Year	% permitted establishments with two in-depth reviews completed	SCMPID reports	SC livestock and poultry slaughter and processing plants and Clemson Livestock Poultry Health Office	Allows state inspected facilities to maintain "at least equal to" status required by the USDA FSIS.	Livestock and poultry slaughter and processing plants	2500.010000.000; 2501.050000.000	
3.2.3	Percent of inspections of meat and poultry plants and HACCP and SSOP records by inspector in charge	100%	100%	100%	Percent	Equal to or greater than	State Fiscal Year	% daily inspection of all slaughter meat and poultry plants and records, when operating. In-depth reviews of meat and poultry plants and HACCP and SSOP records by inspectors.	LPH inspection reports	USDA-PHIS	Required under the Federal Meat and the Federal Poultry Inspection Act to operate as state inspected facility.	Livestock and poultry slaughter and processing plants	2500.010000.000; 2501.050000.000	
3.3	Provide accurate and timely veterinary diagnostic and surveillance testing for early detection of disease, thus improving response and mitigating economic losses in livestock and poultry industry sectors.										State Objective: Maintaining Safety, Integrity and Security			

Perf. Measure Number	Description	Base	Target	Actual	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes	
3.3.1	Pass rate of National Veterinary Services Laboratories (NVSL) proficiency tests for procedures performed in Clemson Veterinary Diagnostic Center for which NVSL monitors test performance.		100%	100%	100%	Percent	Equal to or greater than	State Fiscal Year	Final pass rate of NVSL proficiency tests for procedures performed in Clemson Veterinary Diagnostic Center for which NVSL monitors test performance. Meet NVSL accreditation standards and criteria for technicians to be proficiency certified.	NVSL test results	NAHLN Portal and Clemson Livestock Poultry Health Office	Accurate results for samples submitted to laboratory diagnosing animal pathogens.	SC veterinarians, animal owners, and state and federal inspected livestock and poultry slaughter and processing plants, and the general public.	2500.010000.000; 2501.050000.000	
3.3.2	Maintain ISO 17025 accreditation for Clemson Veterinary Diagnostic Center		100%	100%	100%	Percent Complete	Complete	State Fiscal Year	ISO 17025:2005 Accredited	Accrediting bodies	Clemson Livestock Poultry Health Office	Maintaining quality of diagnostic testing.	SC veterinarians, animal owners, and state and federal inspected livestock and poultry slaughter and processing plants, and the general public.	2500.010000.000; 2501.050000.000

SC veterinarians, animal owners, and state and federal inspected livestock and poultry slaughter and processing plants, and the general public.	2500.010000.000; 2501.050000.000		
<b>4.1 Ensure the safe use of pesticides to protect South Carolina's public health, natural resources and environment.</b>										<b>State Objective: Maintaining Safety, Integrity and Security</b>					
4.1.1	Pesticide Regulation: Structural and Ornamental. Compliance rate category 7 licensed pesticide applicator	97.80%	60%	98%	Percent	equal to or greater than	State Fiscal Year	The structural compliance rate benchmark of 60% was exceeded. For the reporting period, the structural compliance rate was 96%.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Pesticide safety for humans and environment	Homeowners, citizens of South Carolina	2000.010100.00; 2002.050000.00		
4.1.2	Pesticide Regulation: General. Total number of pesticide applicators licensed in category 3	3,380	2,800	3,198	Count	Equal to or greater than	State fiscal year	The total number applicators possessing a valid license during the reporting period.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Homeowners, citizens of South Carolina and pesticide applicators	Homeowners, citizens of South Carolina and pesticide applicators	2000.010100.00; 2002.050000.00		
4.1.3	Pesticide Regulation: Percentage of district employees trained. General; Implement sustainable IPM programs in selected SC school districts	100%	100%	100%	Percent	Equal to or greater than	State Fiscal Year	Applicators contacted and trained to perform pest control activities at schools in 5 Districts inspected and in compliance with regulations	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Municipality and school protection	South Carolina School Districts, citizens of South Carolina, pesticide applicators	2000.010100.00; 2002.050000.00		
<b>4.2 Protect South Carolina's structures from termites and other structural pests by ensuring high standards are met for the pest.</b>										<b>State Objective: Maintaining Safety, Integrity and Security</b>					
4.2.1	The number of compliance, complaints and other inspections conducted annually will be recorded and compared against an established benchmark of 2000 inspections. Regulate the structural and turf/ornamental pest control industries ensuring compliance with pesticide laws and regulations	2,046	2,000	2,369	Count	Equal to or greater than	State fiscal year	The total number of inspections	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Citizens of South Carolina, homeowners, and agriculture and business community	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00; 2002.050000.00		

Perf. Measure Number	Description	Base	Target	Actual	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes	
4.2.2	The percentage of repeat violators (structural compliance)		11%	20%		<2% Percent	equal to or less than	State Fiscal Year	Percentage of repeat violators	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Pesticide safety for humans and environment	Citizens of South Carolina, homeowners, and agriculture and business community	2002.0500000.00	
<b>4.3 Ensure that the fertilizer, lime, landplaster and soil amendments sold in South Carolina will be of high quality and properly labeled. State Objective: Maintaining Safety, Integrity and Security</b>															
4.3.1	The rate of fertilizer samples found deficient. Fertilizer, lime, and soil amendments distributed to end users in South Carolina must meet label guarantees and be free of contaminants		8%	20%		12% Percent	equal to or less than	State Fiscal Year	Percentage of fertilizer samples found deficient.	Annual Fertilizer Report	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Protection of SC farmers and farming operations	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	
<b>4.4 Protect South Carolina' agriculture and the environment from harmful or invasive plant disease, weed, and insect species. State Objective: Maintaining Safety, Integrity and Security</b>															
4.4.1	All nursery growers and dealers inspected and in compliance. Protect South Carolina's ecosystem and all levels of agricultural production by mitigating impact from plant pests, i.e., plant diseases, inspections etc.		100%	100%		100% Percent	equal to or greater than	State Fiscal Year	Percent of nursery grower and dealers inspected that were in compliance.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Consumer protection	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	
4.4.2	Acceptance rate of phytosanitary certificates issued		100%	100%		100% Percent	Equal to or greater than	State Fiscal Year	Percentage of acceptance of phytosanitary certificates.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Consumer and environmental protection	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	725 phytosanitary certificates issued
4.4.3	Number of targeted surveys to detect potential invasive species introductions and regularly survey and treat currently infested sites with the goal of eradication. The fewer the number of surveys, the fewer the pests that are detected in SC.		14	11		15 Count	Equal to or greater than	State fiscal year	Number of targeted invasive species surveys.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Homeowners, citizens of South Carolina	Homeowners, citizens of South Carolina	2000.010100.00	
<b>4.5 Established standards will be met for the production of certified seed. State Objective: Maintaining Safety, Integrity and Security</b>															
4.5.1	Percentage of seed lots inspected in the field that meet purity standards in laboratory tests. Seed is certified as true to variety and meets all official certification standards for quality and purity		100%	99%		99% Percent	equal to or greater than	State Fiscal Year	Percentage of seed lot field inspections that meet purity standards.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	SC farmers and agricultural protection	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	
<b>4.6 Correctly identify or diagnose plant pests and diseases and provide effective control recommendations in a timely manner. State Objective: Maintaining Safety, Integrity and Security</b>															
4.6.1	Percentage of plant samples analyzed to identify or diagnose weed, disease, and insect problems, providing results and control recommendations to clients		100%	100%		100% Percent	Equal to or greater than	State Fiscal Year	Percentage of samples analyzed and recommendations made to clients	Plant Problem Clinic Annual Report	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Consumer protection	Citizens of South Carolina, homeowners, agricultural businesses	2000.010100.00	
<b>4.7 Help prepare South Carolina to better recover from disasters and other emergencies impacting agriculture in the state. State Objective: Maintaining Safety, Integrity and Security</b>															
4.7.1	Percentage of employees trained on the ICS (Incident Command System) in the event of an emergency. Have trainings to make sure that everybody understands their roles		100%	100%		100% Percent	Equal to or greater than	State Fiscal Year	Percent of employees trained on the ICS (Incident Command System)	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Homeland security for SC Citizens	Citizens of South Carolina	2000.010100.00	
<b>4.8 Enforce that established standards will be met for the production of certified organic products. State Objective: Maintaining Safety, Integrity and Security</b>															

Perf. Measure Number	Description	Base	Target	Actual	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes
4.8.1	Percent of NOP accredited certification services to organic producers, processors, and handlers who seek certification through our agency provided to USDA.	100%	100%	100%	Percent	Equal to or greater than	State Fiscal Year	Percent of NOP accredited certification services provided to USDA.	Office Reports	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Consumer and environmental protection	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	
<b>4.9 Provide for effective leadership, management and administration of Division programs, personnel and facilities.</b>											<b>State Objective: Maintaining Safety, Integrity and Security</b>			
4.9.1	Percent of analytical testing for soil, plant tissue, feed and forage, animal waste, irrigation water, and compost samples provided for individual clients, commercial dealers, Extension Agents, Extension Specialists, and researchers in South Carolina	100%	100%	100%	Percent	Equal to or greater than	State Fiscal Year	Percentage of analytical tests performed of samples provided.	Agriculture Service Lab Annual Report	171 Old Cherry Road, Clemson, SC 33634 and electronically	Consumer, environmental, and agricultural protection	Citizens of South Carolina, homeowners, and agriculture and business community, Clemson Extension Services	2000.010100.00	
4.9.2	Percentage of Apiary Inspections conducted	100%	88%	100%	Percent	equal to or greater than	State Fiscal Year	Percentage of apiaries inspected.	Office Reports	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Consumer and environmental protection	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	

## Strategic Plan Development

# FY2025

as submitted for the Accountability Report by:

**P200 - Clemson University- PSA**

- Goal 1** The Clemson Experiment Station aims to identify critical issues and find solutions through research that support South Carolina's agriculture and forest industries.
- Goal 2** The Clemson Cooperative Extension Service will improve the economy, environment, and well-being of South Carolinians through the delivery of unbiased research-based information and education.
- Goal 3** Clemson Livestock Poultry Health will ensure the continued health of the livestock and poultry industry, ensure safe, wholesome, properly labeled meat and poultry products, and protect the public health of the citizens of South Carolina.
- Goal 4** Regulatory Services protects the citizens of South Carolina and the environment by implementing legislatively mandated regulatory programs and by providing other essential programs and services for agriculture and related sectors and for homeowners.

Perf. Measure Number	Description	Base	Target	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes	
<b>1.1 Enhance research prominence in focus areas that maintain and support the growth of South Carolina's agriculture and forest industries.</b>														
<b>State Objective: Education, Training, and Human Development</b>														
1.1.1	The number of research proposals and funding requests submitted to granting agencies		451	250	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	INFO-ED	Clemson Server	Individual grant submissions are typically defined by input from multiple sources of stakeholders.	Stakeholders providing input for external grant submissions include commodity groups (i.e. SC Soybean Board), producer organizations (i.e. Farm Bureau) and individual producers.	3004.000000.000	
1.1.2	The number of research proposal funded extramurally		193	150	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	INFO-ED	Clemson Server	Basic research that identifies potential solutions to agricultural and forest industries challenges	Scientific community; Citizens of SC	3004.000000.000	
1.1.3	The number of technical contributions related to research		124	90	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	Experiment Station Data	Clemson Server; Experiment Station Office	Results of research disseminated to the scientific community for continued investigation and the transfer of technology to agricultural and forest industries.	Scientific community; Citizens of SC	3004.000000.000	
<b>1.2 Strengthen applied research through connections between Clemson University scientists and growers.</b>														
<b>State Objective: Education, Training, and Human Development</b>														
1.2.1	Research proposals that respond to the needs of commodity boards		45	60	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	INFO-ED	Clemson Server	Crop specific commodity boards define research needs annually and calls for research proposals to address those needs.	Commodity boards are elected by South Carolina producers.	3004.000000.000	
<b>1.3 Improve undergraduate and graduate education experiences offered at RECs.</b>														
<b>State Objective: Education, Training, and Human Development</b>														
1.3.1	Number of graduate students recruited and retained		410	150	Count	equal to or greater than	State Fiscal Year (July 1 - June 30).	Total number count	Office of Institutional Research	Clemson Server; Office of Institutional Research	Research results and practices to improve production and/or reduce costs and environmental impacts of agriculture and forestry production.	Ag/forestry producers and industry representatives located in the region of the Research and Education Centers.	3004.000000.000	
<b>2.1 Develop and implement agricultural production systems that are economically sustainable and environmentally sound (Agrisystems Productivity and Profitability)</b>														
<b>State Objective: Education, Training, and Human Development</b>														
2.1.1	Number of acres in South Carolina impacted as a result of Extension programs.		0	300,000	Count	equal to or greater than	State fiscal year	# of acres impacted by Extension programs. The acreage may be impacted from improved practices, alternative crops planted, application of integrated crop management strategies and other land management strategies.	CUMIS	Clemson Extension Office	Education of producers and farmers to ensure economically sustainable and environmentally sound practices	Natural Resources	3504.000000.000	

Perf. Measure Number	Description	Base	Target	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes	
2.1.2	Percentage of producers implementing new practices learned for livestock and forage production		0%	50%	Percent	equal to or greater than	State Fiscal Year	# of producers that self-reported implementation of a livestock/forage production practice. This may include implementation of breeding practices, recommended grazing management systems, establishment of improved forage cultivars, etc.	Clemson University Management Information System (CUMIS)	Clemson Extension Office	Implementation of methods taught that ensure economically sustainable and environmentally sound practices	Producers and farmers	3504.000000.000	
<b>2.2 Agribusiness and Agricultural Workforce Development (Agribusiness)</b>												<b>State Objective: Education, Training, and Human Development</b>		
2.2.1	Number of people served through workshops, one-on-one meetings, online resources and other media outlets.	79,383	200,000	Count	Equal to or greater than	State fiscal year	# people served through direct and indirect methods.	CUMIS and Salesforce	Clemson Extension Office	Education of agricultural business entities to maintain or expand operations or to further develop the ag workforce	Agricultural business entities	3504.000000.000		
2.2.2	Percentage of people reporting a gain in knowledge from workshops	92%	75%	Percent	equal to or greater than	State Fiscal Year	# of people that reported a gain in knowledge as a result of the workshops.	Clemson University Management Information System (CUMIS)	Clemson Extension Office	Change in knowledge to further agricultural business entities	Agricultural business entities	3504.000000.000		
<b>2.3 Conserve and protect all natural resources throughout South Carolina through education and implementation of best management practices (Environmental and Natural Resources Conservation)</b>												<b>State Objective: Education, Training, and Human Development</b>		
2.3.1	Percent of landowners, homeowners, land managers, biologists, engineers, water resources managers and private citizens utilizing practices taught during programs and workshops.	24%	50%	Percent	equal to or greater than	State Fiscal Year	# of participants reporting that they implement knowledge divided by number of participants	Clemson University Management Information System (CUMIS)	Clemson Extension Office	Increase knowledge to protect and conserve natural resources	Landowners	3504.000000.000		
2.3.2	Number of acres owned/managed potentially impacted by forestry and wildlife workshops and programs and acres impacted by Master Naturalist programs	11,766	150,000	Count	Equal to or greater than	State fiscal year	# of acres reported by program attendees and volunteers	CUMIS and Master Naturalist Volunteers	Clemson Extension Office	On-the-ground conservation of natural resources	Natural Resources	3504.000000.000		
<b>2.4 Provide training on the safe preparation, production and handling of food while educating citizens on wise nutritional choices that leads to improved health (Food Safety and Nutrition)</b>												<b>State Objective: Education, Training, and Human Development</b>		
2.4.1	Estimated savings from potentially preventing food-borne illnesses in restaurants.	\$417,690	\$250,000	Dollar amount	Equal to or greater than	State fiscal year	# establishments represented in programs teaching safe food preparation and handling programs (from CUMIS) * \$6,630	CUMIS	Clemson Extension Office	Train restaurant and food workers in safe handling practices to protect food consumers from food-borne illnesses	Restaurants and food consumers	3504.000000.000		
2.4.2	Improve the quality of life for South Carolinians through increased physical and mental health in 5 rural counties.	0	4,000	Count	Equal to or greater than	State fiscal year	# people improving life and improved lifestyles through attendance at health and nutrition programs throughout SC	CUMIS	Clemson Extension Office	Improved quality of life through education on lifestyle and food habits	Rural county residents in SC	3504.000000.000		
<b>2.5 Empower youth to grow into healthy and productive members of society through hands-on, inclusive and mentored learning opportunities (Youth Development and Families)</b>												<b>State Objective: Education, Training, and Human Development</b>		
2.5.1	Potential future volunteer contributions (in dollars) by current 4-H members (projected 15 years into the future).	\$36,396,142	\$20,000,000	Dollar amount	Equal to or greater than	Other	(# 4-H members * Volunteer Hourly rate) * (Avg # Volunteer Hours for 4-H by adults) projected forward 15 years with an inflation rate of 2.5%	ES-237	USDA-NIFA	Community residents benefit through learned sense of volunteer and service by participation in 4-H programs and the future value of the learned service	Community members throughout SC	3504.000000.000		
2.5.2	Percentage of 4-H members engaged in citizenship and community service programs.	11%	25%	Percent	equal to or greater than	Other	Percentage of 4-H participants in citizenship programs divided by total 4-H participation	ES-237	USDA-NIFA	Community residents benefits from increased youth participation in community projects and leadership.	Community members throughout SC	3504.000000.000		

Perf. Measure Number	Description	Base	Target	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder	Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes
<b>3.1 Enforce state and federal animal health laws and regulations by monitoring interstate movement of animals, performing inspections at livestock auction markets, and developing and expanding livestock traceability capability for livestock disease prevention, control, surveillance and eradication programs to protect animal and public health.</b>														
<b>State Objective: Maintaining Safety, Integrity and Security</b>														
3.1.1	Total number of new premises registered by Livestock Poultry Health	11,016	8,625	Count	Equal to or greater than	State Fiscal Year	Total premises registered	LPH reports	Clemson Livestock Poultry Health Office	Improves traceability of active livestock and poultry premises to help resolve animal disease outbreak events.	SC livestock and poultry producers.		2500.010000.000; 2501.050000.000	
3.1.2	Meet disease testing and trace back requirements for continued "disease free" status as specified in the code of federal regulations	100%	100%	Percent Complete	Complete	State Fiscal Year	Disease testing requirements met to maintain status	LPH reports	Clemson Livestock Poultry Health Office	Maintaining state disease-free status allows livestock and poultry producers to export products for national or international sales without (or with less) regulatory restrictions.	SC livestock and poultry producers.		2500.010000.000; 2501.050000.000	
3.1.3	Number of inspections and investigations conducted at locations including livestock markets, exhibitions, sales, and on livestock farms throughout South Carolina	569	450	Count	Equal to or greater than	State fiscal year	Number of inspections, farm visits, and investigations	LPH Reports	Clemson Livestock Poultry Health Office	Maintaining state disease-free status allows livestock and poultry producers to export products for national or international sales without (or with less) regulatory restrictions.	SC livestock markets, and SC and interstate livestock producers.		2500.010000.000; 2501.050000.000	
<b>3.2 Protect the health of consumers by providing a comprehensive inspection service to ensure safe, properly labeled, wholesome meat and poultry products through inspections and regulation in state and federal cross-utilization meat and poultry plants.</b>														
<b>State Objective: Maintaining Safety, Integrity and Security</b>														
3.2.1	Operate under "at least equal to" status from USDA Food Safety Inspection Service (FSIS)	100%	100%	Percent Complete	Complete	State Fiscal Year	On-site triennial review by FSIS and desk review each of the two years in between	FSIS designation	FSIS and Clemson Livestock Poultry Health Office	Required under the Federal Meat and the Federal Poultry Inspection Act to operate as state inspected facility.	Livestock and poultry slaughter and processing plants		2500.010000.000; 2501.050000.000	
3.2.2	Percent of state permitted fully inspected establishments with two in-depth reviews completed	100%	100%	Percent	Equal to or greater than	State Fiscal Year	% permitted establishments with two in-depth reviews completed	SCMPID reports	SC livestock and poultry slaughter and processing plants and Clemson Livestock Poultry Health Office	Allows state inspected facilities to maintain "at least equal to" status required by the USDA FSIS.	Livestock and poultry slaughter and processing plants		2500.010000.000; 2501.050000.000	
3.2.3	Percent of inspections of meat and poultry plants and HACCP and SSOP records by inspector in charge	100%	100%	Percent	Equal to or greater than	State Fiscal Year	% daily inspection of all slaughter meat and poultry plants and records, when operating. In-depth reviews of meat and poultry plants and HACCP and SSOP records by inspectors.	LPH inspection reports	USDA-PHIS	Required under the Federal Meat and the Federal Poultry Inspection Act to operate as state inspected facility.	Livestock and poultry slaughter and processing plants		2500.010000.000; 2501.050000.000	
<b>3.3 Provide accurate and timely veterinary diagnostic and surveillance testing for early detection of disease, thus improving response and mitigating economic losses in livestock and poultry industry sectors.</b>														
<b>State Objective: Maintaining Safety, Integrity and Security</b>														
3.3.1	Pass rate of National Veterinary Services Laboratories (NVSL) proficiency tests for procedures performed in Clemson Veterinary Diagnostic Center for which NVSL monitors test performance.	100%	100%	Percent	Equal to or greater than	State Fiscal Year	Final pass rate of NVSL proficiency tests for procedures performed in Clemson Veterinary Diagnostic Center for which NVSL monitors test performance. Meet NVSL accreditation standards and criteria for technicians to be proficiency certified.	NVSL test results	NAHLN Portal and Clemson Livestock Poultry Health Office	Accurate results for samples submitted to laboratory diagnosing animal pathogens.	SC veterinarians, animal owners, and state and federal inspected livestock and poultry slaughter and processing plants, and the general public.		2500.010000.000; 2501.050000.000	
3.3.2	Maintain ISO 17025 accreditation for Clemson Veterinary Diagnostic Center	100%	100%	Percent Complete	Complete	State Fiscal Year	ISO 17025:2005 Accredited	Accrediting bodies	Clemson Livestock Poultry Health Office	Maintaining quality of diagnostic testing.	SC veterinarians, animal owners, and state and federal inspected livestock and poultry slaughter and processing plants, and the general public.		2500.010000.000; 2501.050000.000	

Perf. Measure Number	Description	Base	Target	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes
3.3.3	Number of diagnostic procedures performed.	91,959	80,000	Count	Equal to or greater than	State fiscal year	Total number of diagnostic procedures to accomplish mission and serve SC veterinarians and livestock and poultry producers.	LPH reports	Clemson Livestock Poultry Health Office	Diagnostic testing to detect animal and foodborne pathogens.	SC veterinarians, animal owners, and state and federal inspected livestock and poultry slaughter and processing plants, and the general public.	2500.010000.000; 2501.050000.000	
3.3.4	Percent of diagnostic procedures performed that are regulatory/production animal related	98%	90%	Percent	equal to or greater than	State Fiscal Year	Percentage of diagnostic procedures that are regulatory/production animal related diagnostics directly related to primary mission serving SC veterinarians and livestock and poultry producers.	LPH reports	Clemson Livestock Poultry Health Office	Regulatory testing to detect animal and foodborne pathogens to protect the food supply and public health.	SC veterinarians, animal owners, and state and federal inspected livestock and poultry slaughter and processing plants, and the general public.	2500.010000.000; 2501.050000.000	
<b>4.1 Ensure the safe use of pesticides to protect South Carolina's public health, natural resources and environment. State Objective: Maintaining Safety, Integrity and Security</b>													
4.1.1	Pesticide Regulation: Structural and Ornamental. Compliance rate category 7 licensed pesticide applicator	98%	60%	Percent	equal to or greater than	State Fiscal Year	The structural compliance rate benchmark of 60% was exceeded. For the reporting period, the structural compliance rate was 96%.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Pesticide safety for humans and environment	Homeowners, citizens of South Carolina	2000.010100.00; 2002.050000.00	
4.1.2	Pesticide Regulation: General. Total number of pesticide applicators licensed in category 3	3,198	2,800	Count	Equal to or greater than	State fiscal year	The total number applicators possessing a valid license during the reporting period.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Homeowners, citizens of South Carolina and pesticide applicators	Homeowners, citizens of South Carolina and pesticide applicators	2000.010100.00; 2002.050000.00	
4.1.3	Pesticide Regulation: Percentage of district employees trained. General; Implement sustainable IPM programs in selected SC school districts	100%	100%	Percent	Equal to or greater than	State Fiscal Year	Applicators contacted and trained to perform pest control activities at schools in 5 Districts inspected and in compliance with regulations	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Municipality and school protection	South Carolina School Districts, citizens of South Carolina, pesticide applicators	2000.010100.00; 2002.050000.00	
<b>4.2 Protect South Carolina's structures from termites and other structural pests by ensuring high standards are met for the pest. State Objective: Maintaining Safety, Integrity and Security</b>													
4.2.1	The number of compliance, complaints and other inspections conducted annually will be recorded and compared against an established benchmark of 2000 inspections. Regulate the structural and turf/ornamental pest control industries ensuring compliance with pesticide laws and regulations	2,369	2,000	Count	Equal to or greater than	State fiscal year	The total number of inspections	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Citizens of South Carolina, homeowners, and agriculture and business community	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00; 2002.050000.00	
4.2.2	The percentage of repeat violators (structural compliance)	<2%	20%	Percent	equal to or less than	State Fiscal Year	Percentage of repeat violators	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Pesticide safety for humans and environment	Citizens of South Carolina, homeowners, and agriculture and business community	2002.050000.00	
<b>4.3 Ensure that the fertilizer, lime, landplaster and soil amendments sold in South Carolina will be of high quality and properly labeled. State Objective: Maintaining Safety, Integrity and Security</b>													
4.3.1	The rate of fertilizer samples found deficient. Fertilizer, lime, and soil amendments distributed to end users in South Carolina must meet label guarantees and be free of contaminants	12%	20%	Percent	equal to or less than	State Fiscal Year	Percentage of fertilizer samples found deficient.	Annual Fertilizer Report	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Protection of SC farmers and farming operations	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	
<b>4.4 Protect South Carolina' agriculture and the environment from harmful or invasive plant disease, weed, and insect species. State Objective: Maintaining Safety, Integrity and Security</b>													

Perf. Measure Number	Description	Base	Target	Value Type	Desired Outcome	Time Applicable	Calculation Method	Data Source	Data Location	Stakeholder Need Satisfied	Primary Stakeholder	State Funded Program Number Responsible	Notes		
4.4.1	All nursery growers and dealers inspected and in compliance. Protect South Carolina's ecosystem and all levels of agricultural production by mitigating impact from plant pests, i.e., plant diseases, inspections etc.		100%		100%	Percent	equal to or greater than	State Fiscal Year	Percent of nursery grower and dealers inspected that were in compliance.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Consumer protection	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	
4.4.2	Acceptance rate of phytosanitary certificates issued		100%		100%	Percent	Equal to or greater than	State Fiscal Year	Percentage of acceptance of phytosanitary certificates.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Consumer and environmental protection	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	
4.4.3	Number of targeted surveys to detect potential invasive species introductions and regularly survey and treat currently infested sites with the goal of eradication. The fewer the number of surveys, the fewer the pests that are detected in SC.		15		11	Count	Equal to or greater than	State fiscal year	Number of targeted invasive species surveys.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Homeowners, citizens of South Carolina	Homeowners, citizens of South Carolina	2000.010100.00	
<b>4.5 Established standards will be met for the production of certified seed.</b>												<b>State Objective: Maintaining Safety, Integrity and Security</b>			
4.5.1	Percentage of seed lots inspected in the field that meet purity standards in laboratory tests. Seed is certified as true to variety and meets all official certification standards for quality and purity		99%		99%	Percent	equal to or greater than	State Fiscal Year	Percentage of seed lot field inspections that meet purity standards.	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	SC farmers and agricultural protection	Citizens of South Carolina, homeowners, and agriculture and business community	2000.010100.00	
<b>4.6 Correctly identify or diagnose plant pests and diseases and provide effective control recommendations in a timely manner.</b>												<b>State Objective: Maintaining Safety, Integrity and Security</b>			
4.6.1	Percentage of plant samples analyzed to identify or diagnose weed, disease, and insect problems, providing results and control recommendations to clients		100%		100%	Percent	Equal to or greater than	State Fiscal Year	Percentage of samples analyzed and recommendations made to clients	Plant Problem Clinic Annual Report	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Consumer protection	Citizens of South Carolina, homeowners, agricultural businesses	2000.010100.00	
<b>4.7 Help prepare South Carolina to better recover from disasters and other emergencies impacting agriculture in the state.</b>												<b>State Objective: Maintaining Safety, Integrity and Security</b>			
4.7.1	Percentage of employees trained on the ICS (Incident Command System) in the event of an emergency. Have trainings to make sure that everybody understands their roles		100%		100%	Percent	Equal to or greater than	State Fiscal Year	Percent of employees trained on the ICS (Incident Command System)	Office Records	511 Westinghouse Road, Pendleton, SC 33670 and electronically	Homeland security for SC Citizens	Citizens of South Carolina	2000.010100.00
